Joywings QuestionBook Reader

Joywings QuestionBook Editor

Joywings QuestionBook Activator

Documentation

Version 1.3

Preface

The QuestionBook system comprises the set of the following three applications –

- i) Joywings QuestionBook Editor (JQE),
- ii) Joywings QuestionBook Reader (JQR) and
- iii) Joywings QuestionBook Activator (JQA).

Altogether these three applications form a system which allows users to make question books. Each question book comprises number of question papers. These question books are created in Joywings QuestionBook Editor (JQE). Once these question books are distributed to the candidates (end users), they can attempt the question papers in those question books in their computer using the Joywings QuestionBook Reader (JQR) application. The question books created can be of free version or paid version. If the question book is a paid version, then the end user needs an activation key to import question book in his JQR. To get the activation key a serial number is generated by JQR for each individual candidate. Once this serial number is provided to the creator of the question book, he can provide the activation key using the Joywings QuestionBook Activator (JQA).

The Joywings QuestionBook Editor (JQE) can create QuestionBooks comprising several question papers. Each question paper can contain up to 5 sections with each section comprising up to 999 questions. The question paper may have fixed time or each individual section in question paper may have fixed time.

The system is useful for competitive examination classes, schools and colleges where these organizations (Users) need to provide mock tests to the students (Candidates/End Users) so that they can practice for the various competitive examinations. The aim of such practice is to enhance their problem-solving speed and strengthen performance for the examinations by providing the same user interface as the live examination itself.

This documentation explains the working of all these three applications in detail.

- Pramod R. Gajbhiye

1. Joywings QuestionBook Reader

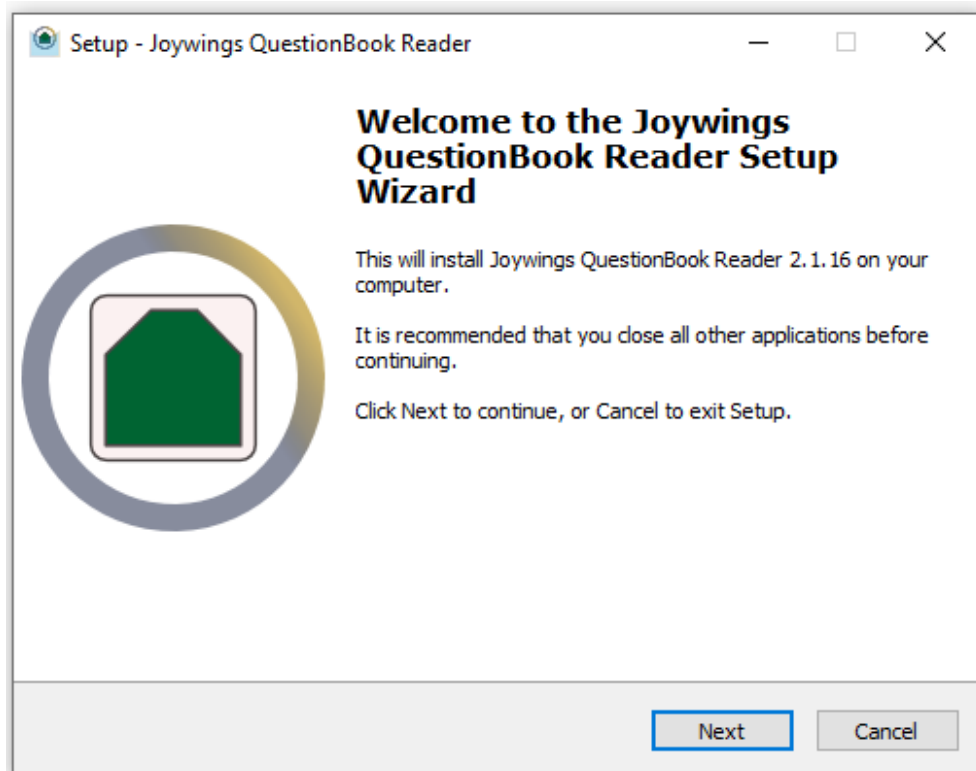

The Joywings QuestionBook Reader (JQR) is an application which imports the QuestionBooks created in the Joywings QuestionBook Editor. It then runs question papers in QuestionBooks as mock tests according to the configuration set in the Joywings QuestionBook Editor (JQE). After the mock tests, the performance is saved by the application for the analysis purpose. Apart from the mock tests, the JQR provides Dummy Exam feature through which an end user (herein after referred as a candidate) can practice question papers in physical books or pdfs on his computer through the JQR. The performance in Dummy Exam is also saved by the application for the analysis purpose. The application is fault tolerant which means if the mock test is interrupted due to computer problems, it is capable of resuming the test where it had left earlier after the computer restarts. The application does not need internet connection and runs completely in offline mode.

1.1) System Requirements

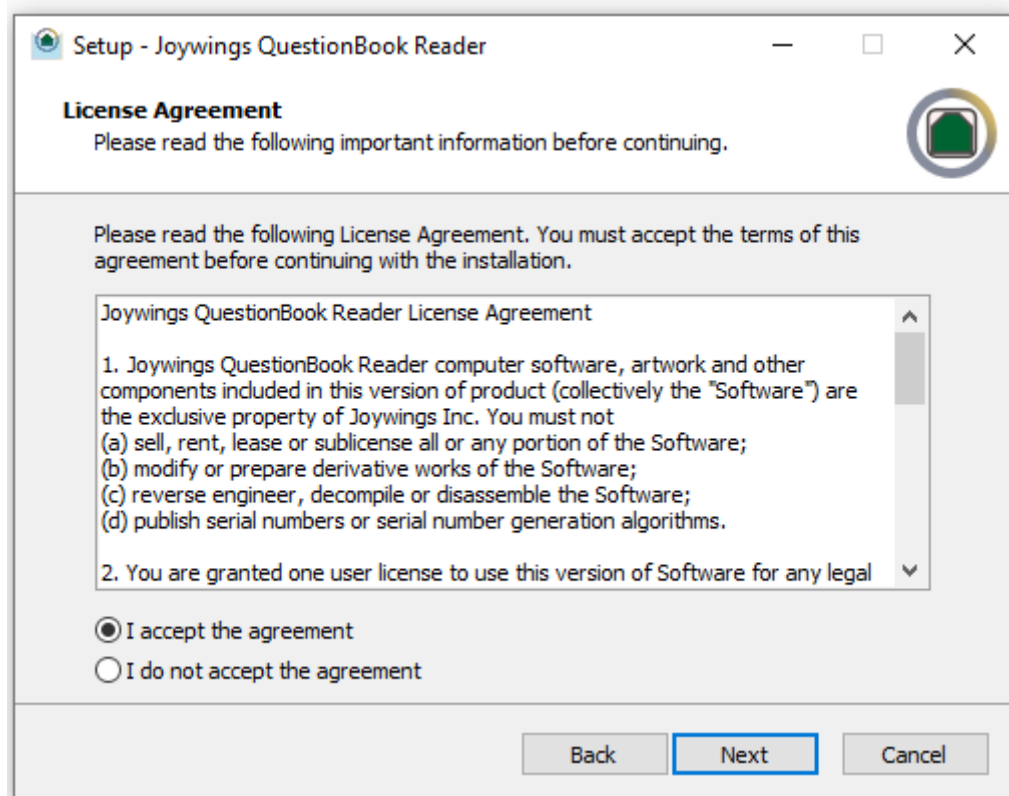

- i) A Windows computer with Intel Pentium 4 or higher. 2 GB RAM or higher.
- ii) Windows Vista, Windows 7, Windows 8, Windows 8.1, Windows 10, Windows 11 operating systems supported. Separate executable is provided for Windows XP.
- iii) Microsoft Office is required to be installed on a candidate computer.

1.2) Installing the application

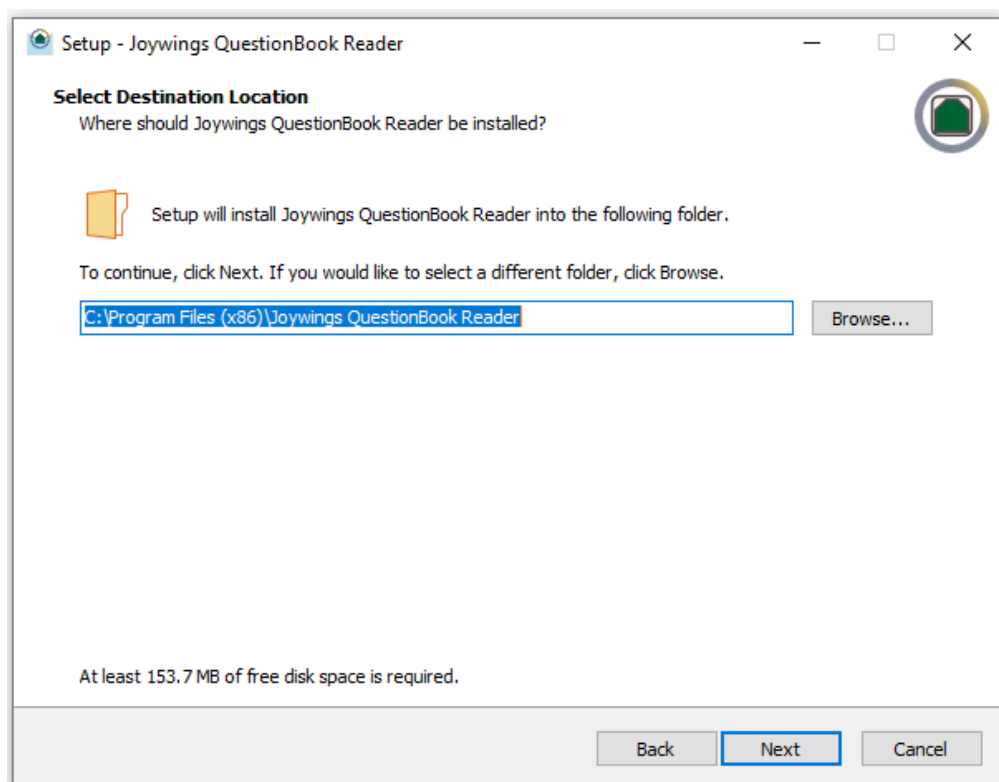

Click on the installer file and following setup window appears –

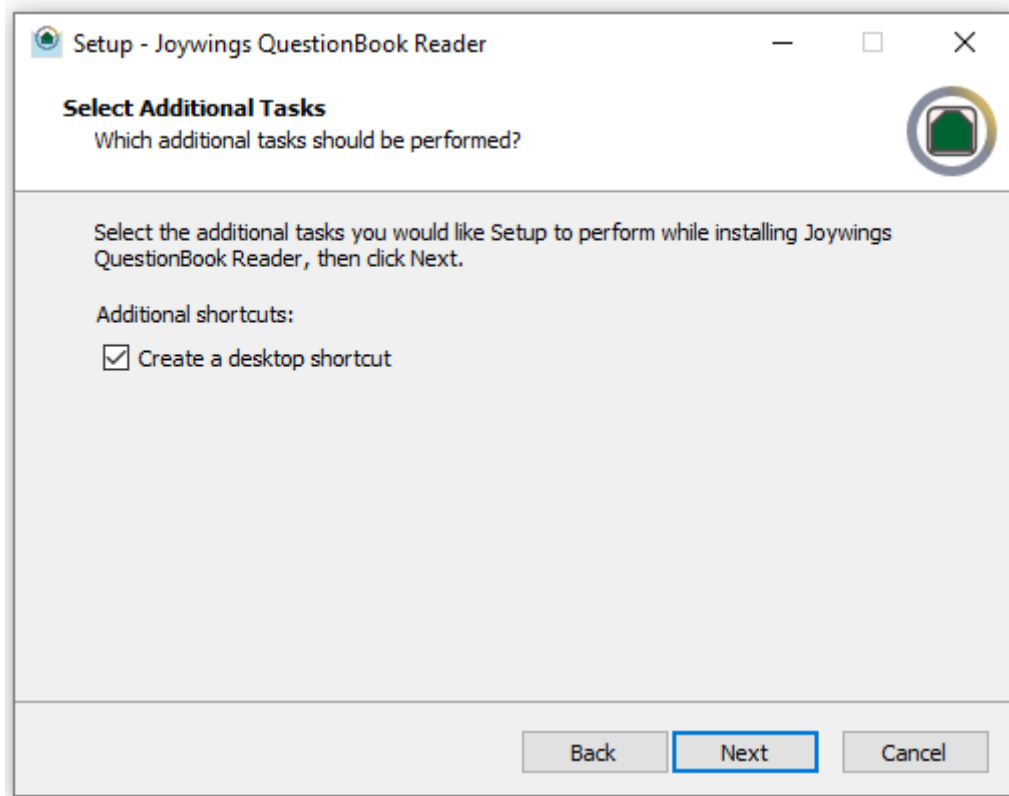

Click Next

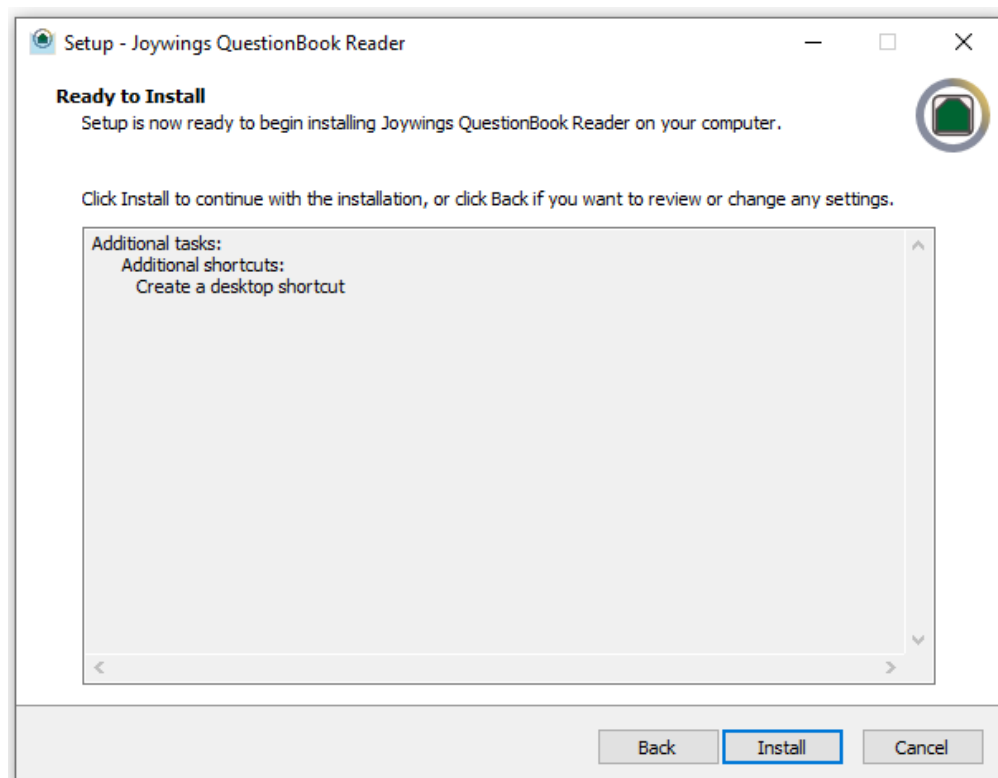

Select 'I accept the agreement' option and click the 'Next' button to proceed.

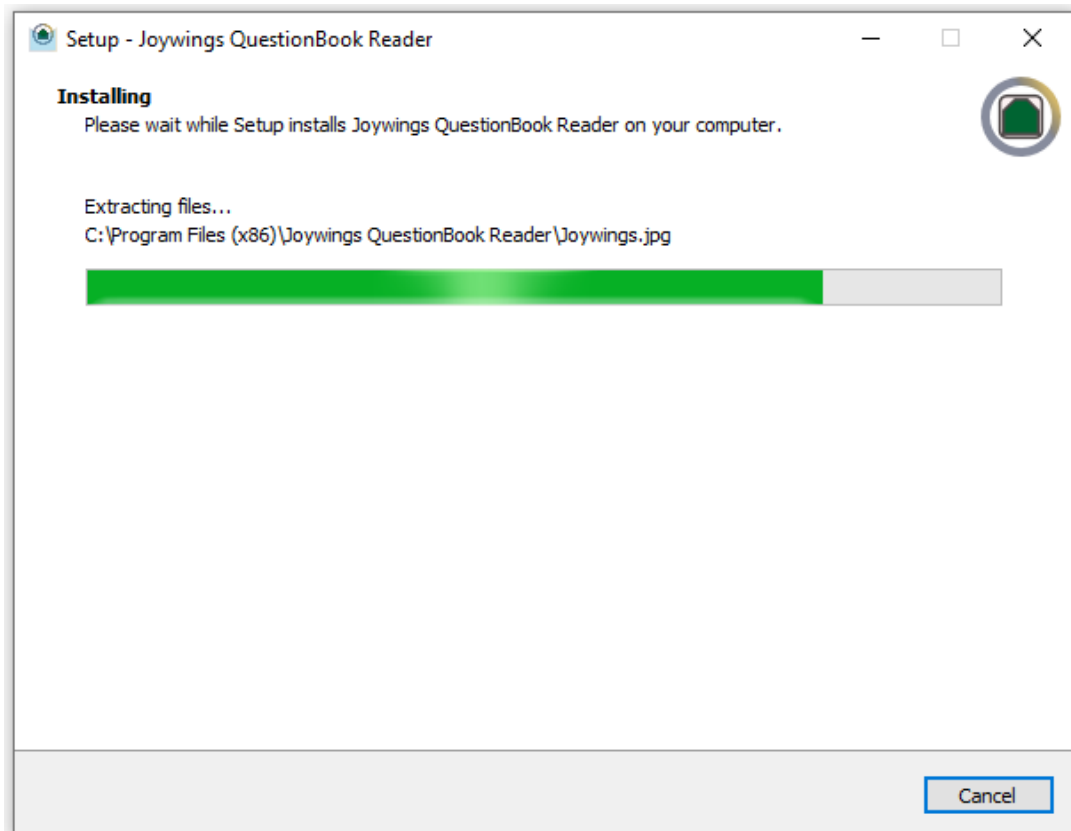

Select the installation location and click the 'Next' button to proceed.

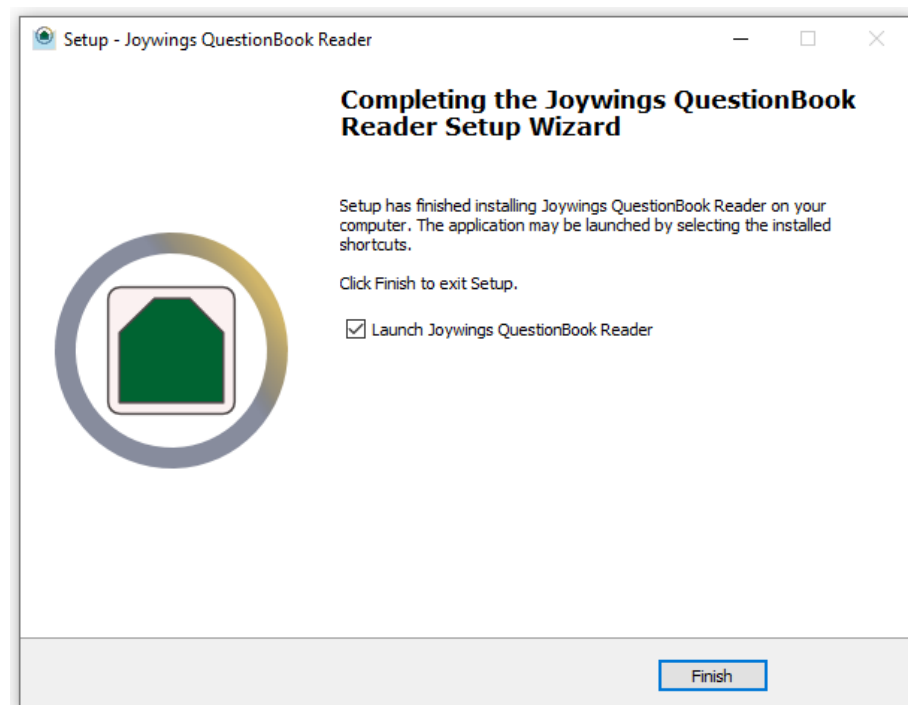

Check 'Create a desktop shortcut' checkbox if you want to create Joywings QuestionBook Reader icon on your desktop and click the 'Next' button to proceed.

Click the 'Install' button to install the application.

The next window shows the progress of the application being installed on your computer.

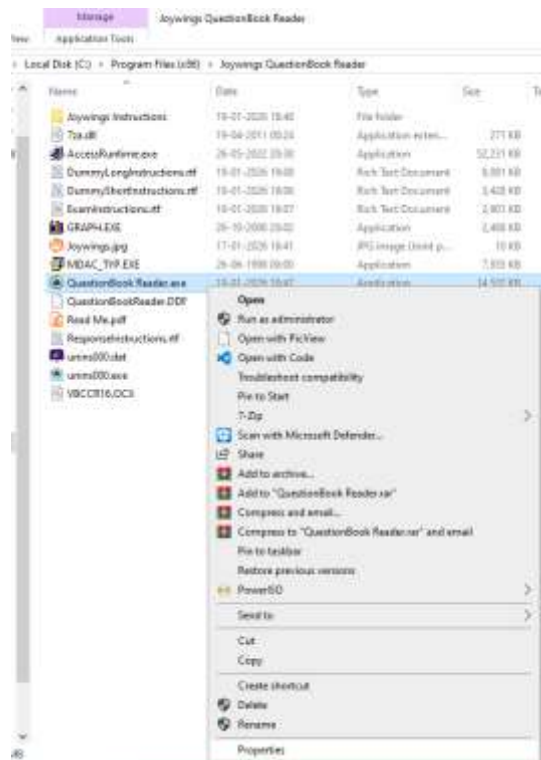

Once the application has been successfully installed on your computer, you see the above window on your screen. The application menu is created in your Start menu and a desktop icon is created as well.

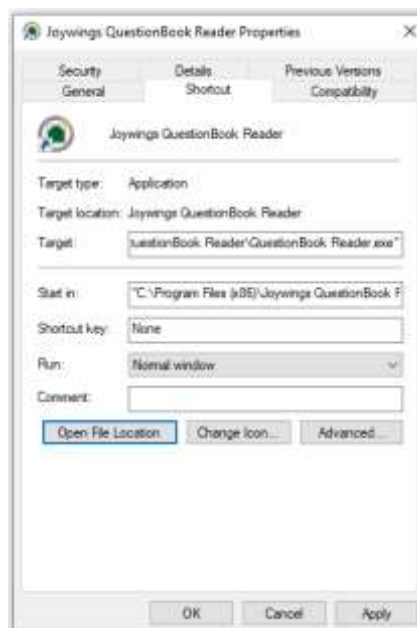

Please don't launch the application yet because it may not show itself properly on high resolution displays. Little tinkering in the application properties as given below are needed to correct the application display.

(Please close the application if it is already launched.)

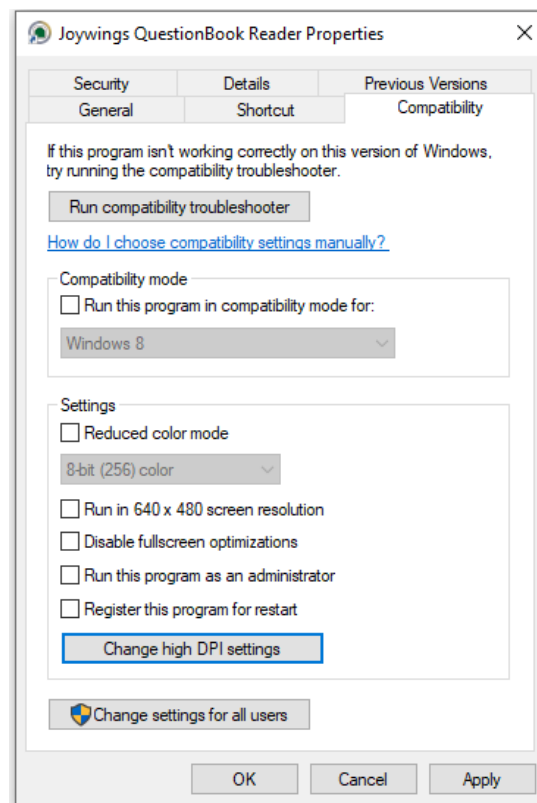

Navigate to the application installed location (e.g. 'C:\Program Files (x86)\Joywings QuestionBook Reader') and right click the 'QuestionBook Reader.exe' file and select 'Properties' from the popup menus as shown in the picture below.

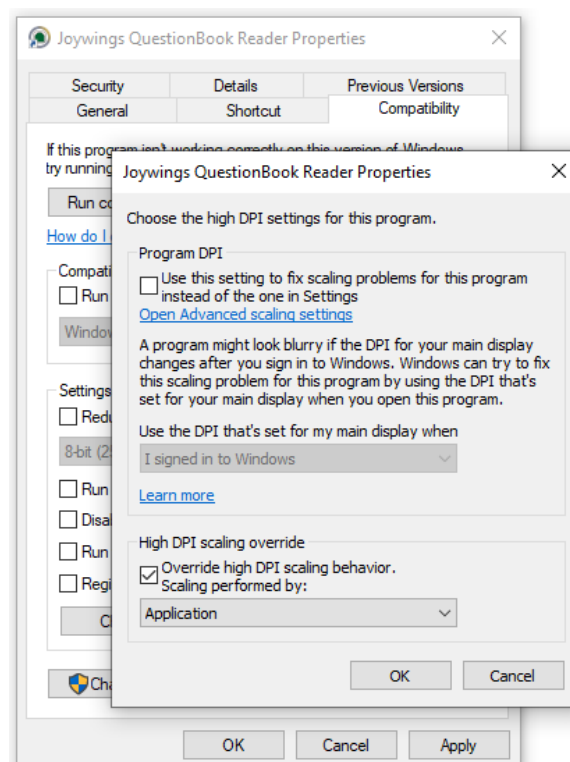

The 'Joywings QuestionBook Reader Properties' window opens up as shown below.

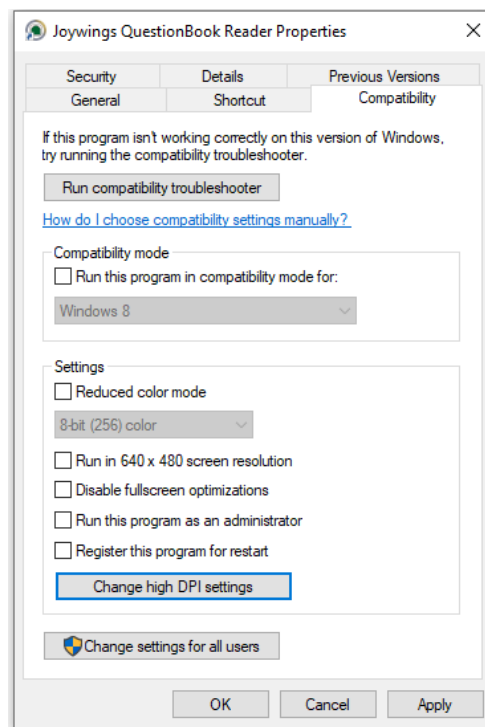

Now click on the 'Compatibility' tab as shown below. Next click on the 'Change high DPI settings' button.

In the following window check the 'Override high DPI scaling behavior.' Checkbox and select the 'Application' item from the combo box under 'Scaling performed by:' heading. Next click on 'Ok' button.

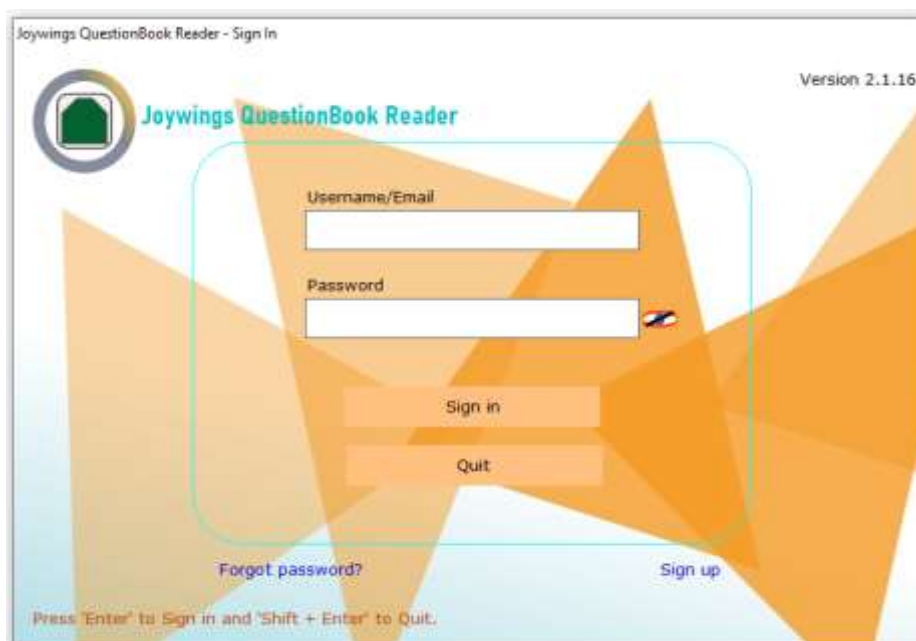

Next click on the 'Apply' button and then click on the 'Ok' button as shown in the picture below.

Now you may launch the application. But for the first time launch the application using administrative privileges. This action registers necessary dependencies and avoids any errors. Right click the application icon and select 'Run as administrator' from the context menu.

1.3) Registering into the Joywings QuestionBook Reader

The following window appears when you launch the application. Here you can sign up as a candidate, Login into the application if you have already registered or recover your credentials in case you forget them.

To begin with, click on the 'Sign up' link and fill up your information on the next window. This information is not shared with anyone and stays only on your computer. This information is only used for the representation purpose of the application.

(The Roll No. field is auto-generated by the application). After you have filled up all the fields click on the 'Proceed' button to view the following window.

Joywings QuestionBook Reader - Profile

Welcome to the Joywings QuestionBook Reader!
This application is designed to practice the Mock Examinations directly on your Windows PC.

Please fill up the following information carefully. This information will be used as Profile information for the application.

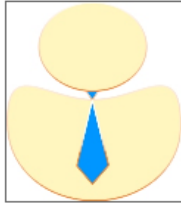

Name

Date of Birth

Contact No.

Roll No.

Upload Photo

*This application requires MS-Office 2007 or later to be installed on this PC. Please ensure MS-Office 2007 or later is installed before proceeding.

Fill up the e-mail and password fields and click on the 'Register' button to complete the registration.

Joywings QuestionBook Reader - Profile

[Back](#)

You should get the following window when the registration is successfully completed.

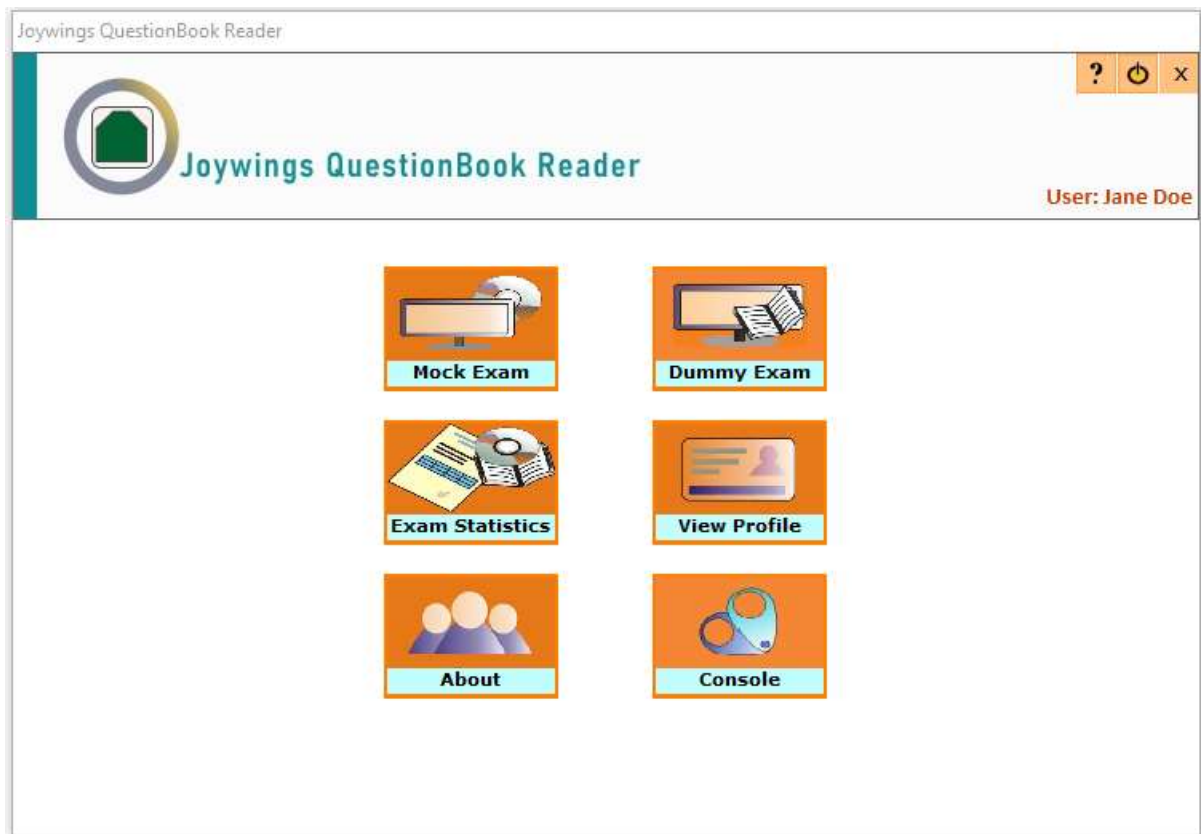

An account recovery file with pattern 'roll_number_Recovery.recover' is saved on the last drive of your hard disk. Keep this file safe as it can be used to recover your credentials in case you forget them.

At this point, you have successfully completed your registration and you are ready to login into the application.

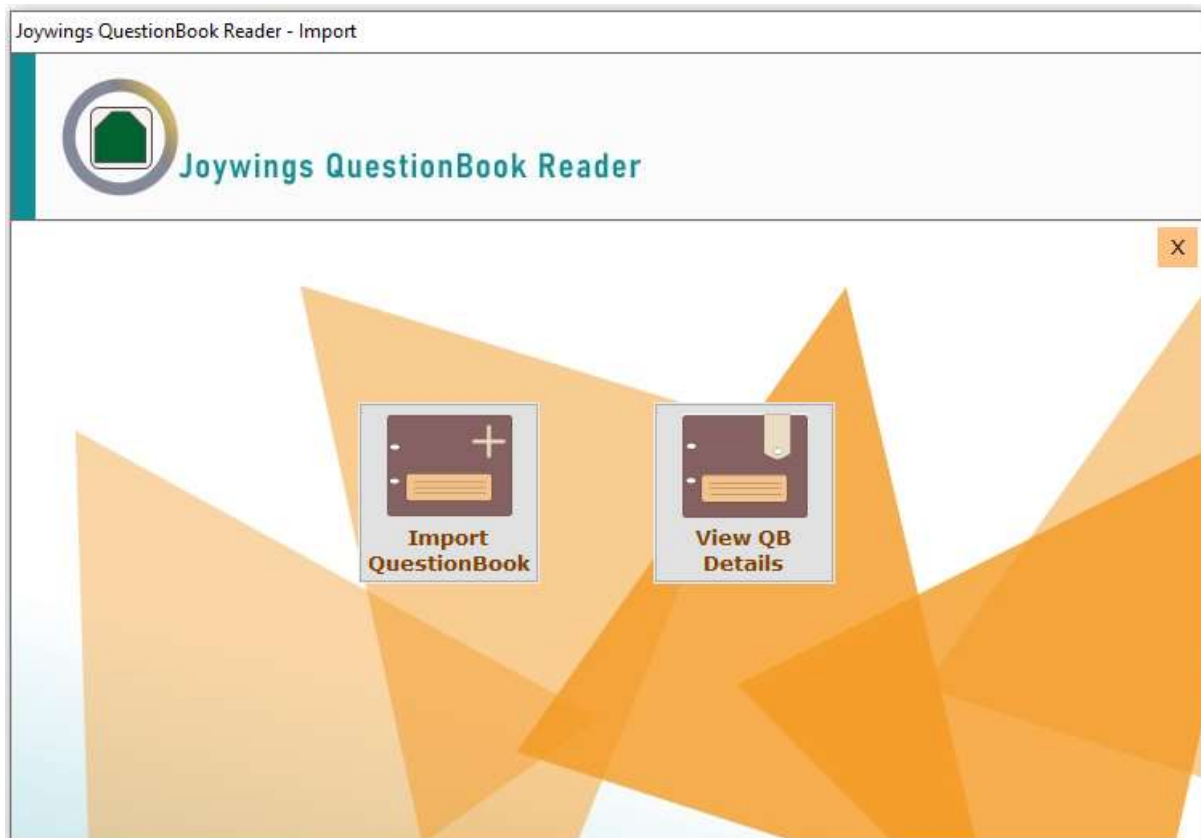

1.4) The Home Window

After you have logged into the Joywings QuestionBook Reader, the following home window appears. There are two types of tests you may consider to take.

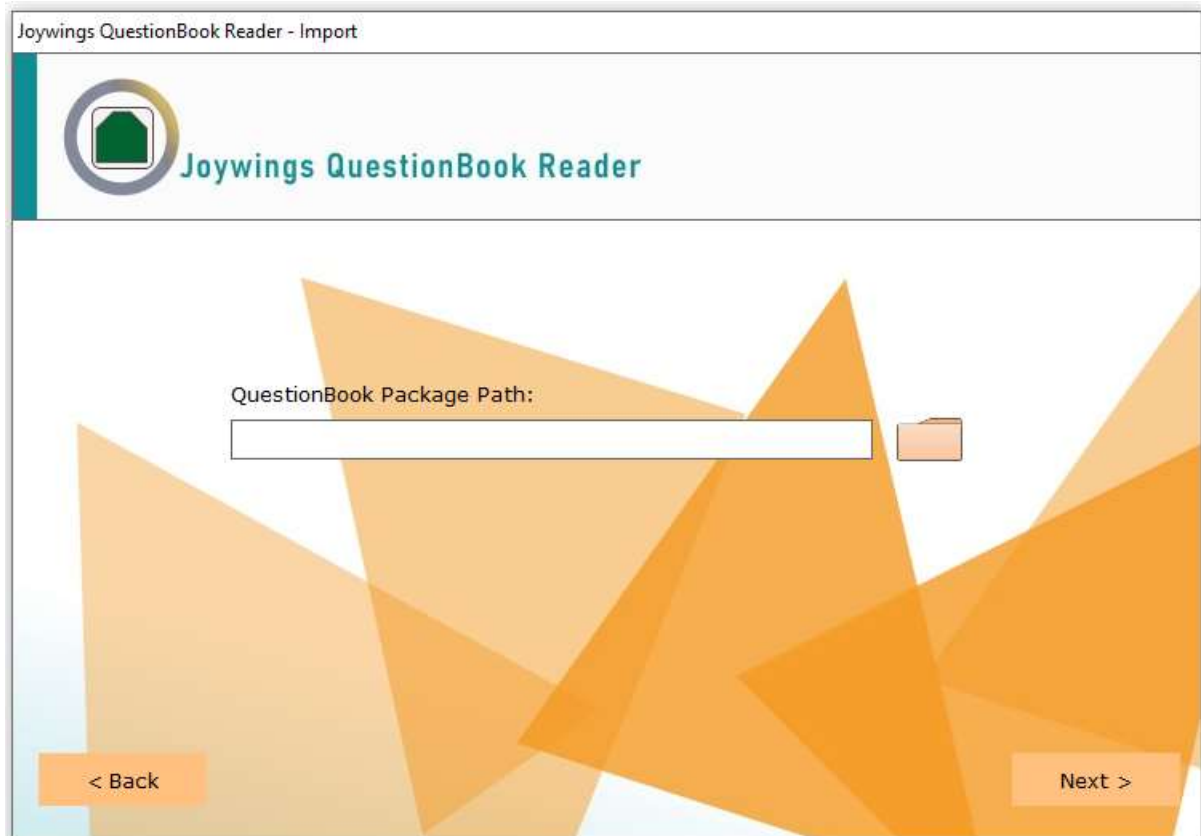

- a) Mock Exam
 - You can attempt question papers in a question book you have imported using the Console menu.
- b) Dummy Exam
 - You can attempt the question papers in your physical book (or pdf) and self-assess your answers by comparing the answers in that book.

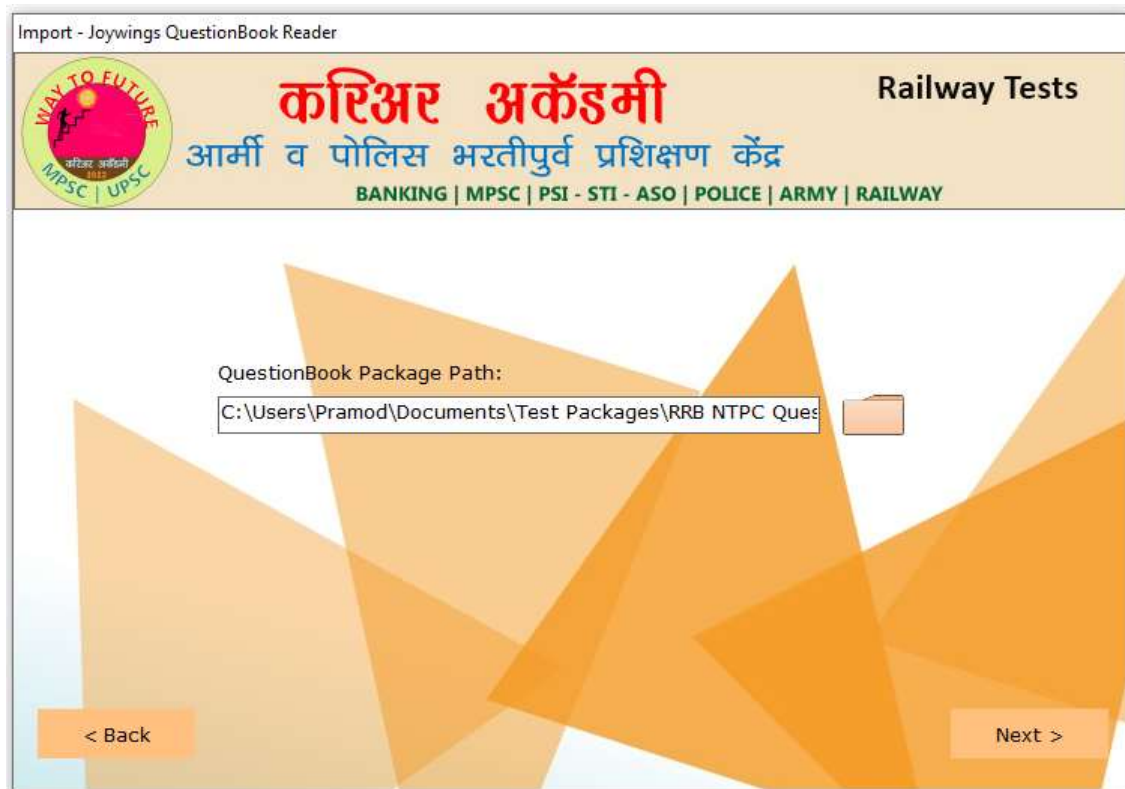

Let us start with the Mock Exam. We start by importing a question book through the Console button. Click on the Console button to view the following 'Import' window.

Now, click on the 'Import QuestionBook' button to view the following window.

Select the desired question book from your hard disk by clicking on the folder button and click on the 'Next' button.

The next window shows the banner of the creator and the information about the question book.

Again, click on the 'Next' button to confirm the import of the question book. This question book has subscription status – Free. Therefore, it is readily imported after clicking on the 'Next' button and the following confirmation window shows up.

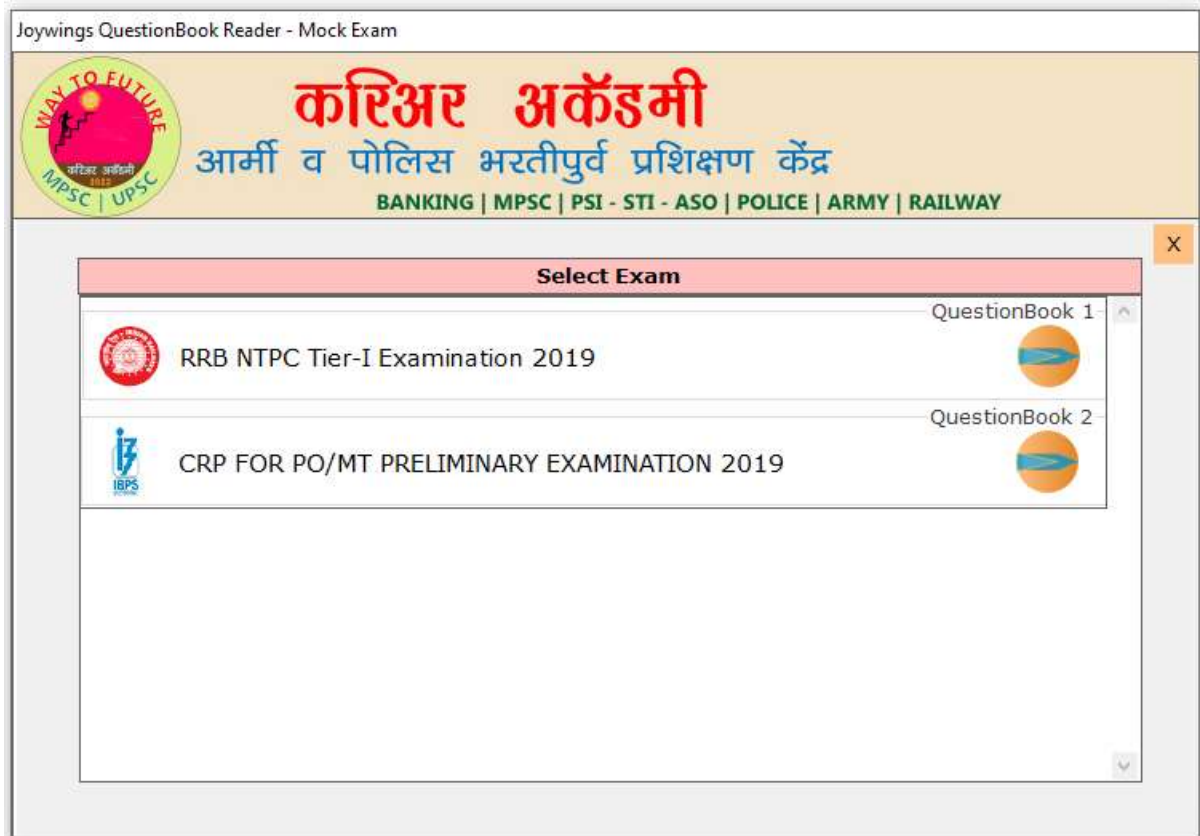

If the question book has subscription status – Paid then the following window appears.

The screenshot shows a window titled "Import - Joywings QuestionBook Reader". The header area is similar to the previous window, with the "WAY TO FUTURE" logo and "करिअर अकॅडमी" text. However, the text "Banking Tests" is visible on the right side of the header. The main content area has a "Serial Number:" label followed by a text box containing "B88V-M8QY-80WB-7JEV-PM7J-427J-7JR3-42AD-4242". Below this is a "QuestionBook Activation Key:" label followed by an empty text box. At the bottom are two buttons: "Validate" and "Exit".

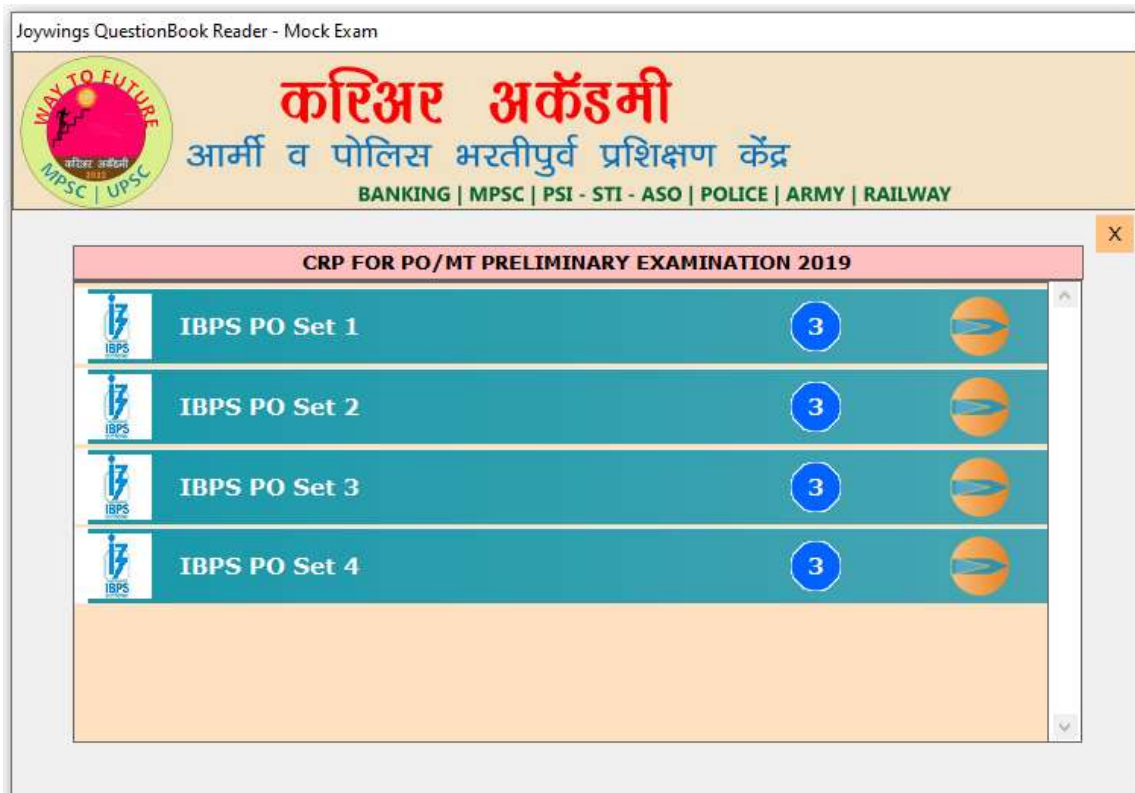

Here you need to enter 'Activation Key' to import the question book. The creator of the QuestionBook should provide the key after receiving the 'Serial Number' from the candidate. After entering the key and clicking the 'Validate' button the question book is successfully imported.

1.5) Attempting question papers

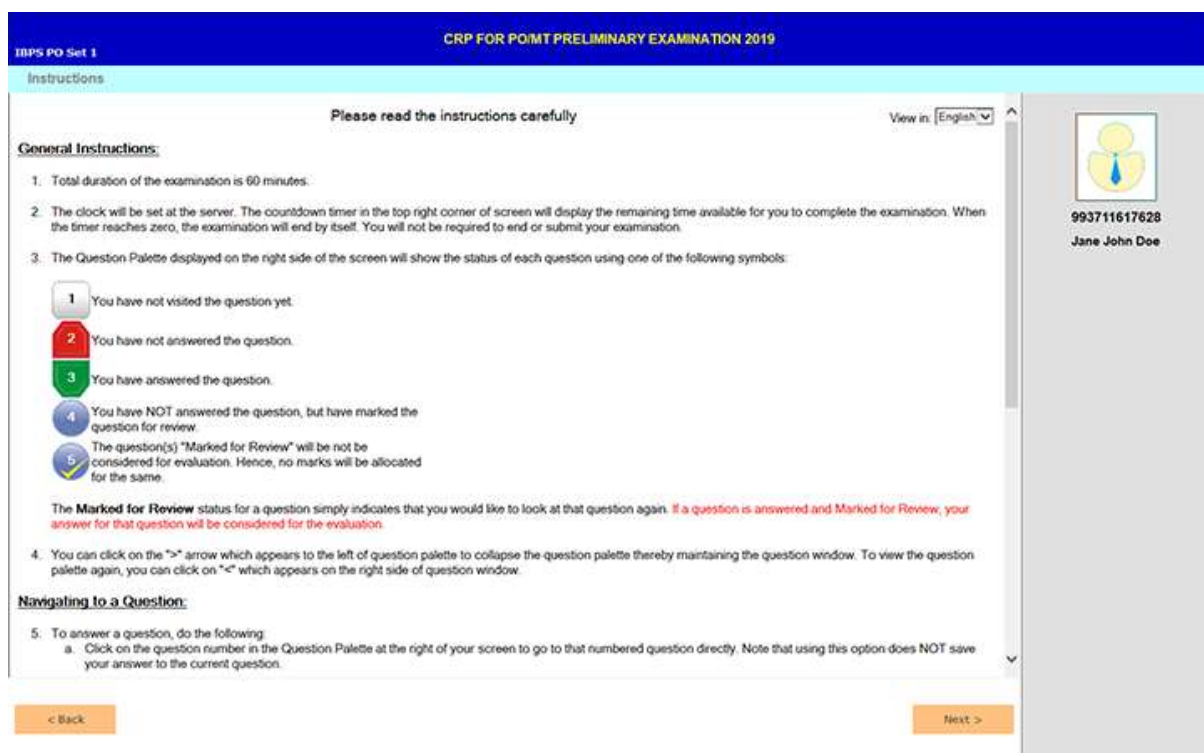

To attempt the question papers in a question book you have imported click on the 'Mock Exam' button on the Welcome window. You are presented with the following window showing the list of the question books you have imported.

Select the desired question book to attempt the question papers in it. This will take you to the following window with the list of question papers available.

Select the desired question paper set to attempt it. This will take you the first instructions window as shown below.

Once you have finished reading the instructions, click the 'Next' button to reach the second instructions window shown below.

Other Important Instructions

1. The details of the exam are as given below -

Sr. No.	Name of Test	No. of Qs	Max Marks	Duration
1	English	30	30	20 minutes
2	Quantitative Aptitude	35	35	20 minutes
3	Reasoning Ability	35	35	20 minutes
Total		100	100	60 minutes

2. You can attempt any question in the section for the prescribed time.

3. Each question has five options out of which only one option will be correct.

4. Each question has 1.00 marks. For each wrong answer 0.25 negative marks for the given question will be deducted.

5. One question will be displayed on the screen at a time. You are requested to be aware of the amount of time you spend per question. Do not spend too much time on any question.

6. Do not touch any of the keyboard key during exam as this will lock the exam.

Choose your default language: English

☐ I have read and understood the instructions. All computer hardware allotted to me are in proper working condition. I declare that I am not in possession of/not wearing/not carrying any prohibited gadget like mobile phone, bluetooth devices etc./any prohibited material with me into the Examination Hall. I agree that in case of not adhering to the instructions, I shall be liable to be debarred from this test and/or disciplinary action, which may include ban from future Tests/Examination.

Question No. 21

Comprehension:

Read the following passage carefully and answer the questions given on it. Certain words are given in bold to help you to locate them while answering some of the questions.

To summarize the Classic Maya collapse, we can tentatively identify five strands. I acknowledge, however, that Maya archaeologists still disagree vigorously among themselves-in part, because the detailed archaeological studies are available for only some Maya sites: and because it remains puzzling why most of the Maya heartland remained nearly empty of population and failed to recover after the collapse and after re-growth of forests. With those caveats, it appears to me that one strand consisted of population growth outstripping available resources: a dilemma similar to the one foreseen by Thomas Malthus in 1798 and being played out today in Rwanda, Haiti, and elsewhere. As the archaeologist David Webster **succinctly** puts it, "Too many farmers grew too many crops on too much of landscape." Compounding that mismatch between population and resource was the second strand: the effects of deforestation and hillside erosion, which caused a decrease in the amount of useable farmland at a time when more rather than less farmland was needed, and possibly exacerbated by an anthropogenic drought resulting from deforestation, by soil nutrient depletion and other soil problem, and

Question:

By an anthropogenic drought, the author means -

- ☐ A drought caused by lack of rains.
- ☐ A drought caused due to deforestation.
- ☐ A drought caused by failure to prevent bracken ferns from overrunning the fields.
- ☐ A drought caused by actions of humans beings.
- ☐ A drought caused by climate changes.

Please read the instructions carefully

View in: English

General Instructions:

- Total duration of the examination is 60 minutes.
- The clock will be set at the server. The countdown timer in the top right corner of screen will display the remaining time available for you to complete the examination. When the timer reaches zero, the examination will end by itself. You will not be required to end or submit your examination.
- The Question Palette displayed on the right side of the screen will show the status of each question using one of the following symbols:

1

You have not visited the question yet

2

You have not answered the question.

3

You have answered the question.

4

You have NOT answered the question, but have marked the question for review.

5

The question(s) "Marked for Review" will be not be considered for evaluation. Hence, no marks will be allocated for the same.

The **Marked for Review** status for a question simply indicates that you would like to look at that question again. If a question is answered and Marked for Review, your answer for that question will be considered for the evaluation.

- You can click on the ">" arrow which appears to the left of question palette to collapse the question palette thereby maintaining the question window. To view the question palette again, you can click on "<" which appears on the right side of question window.

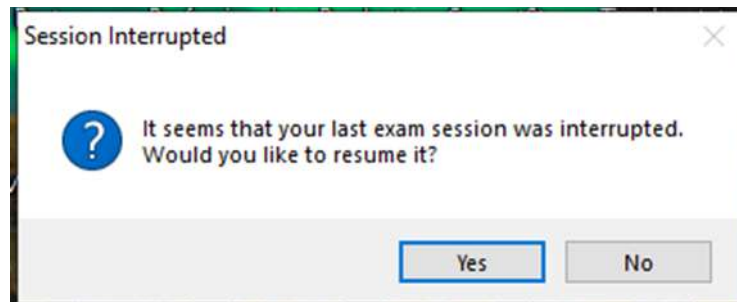

Navigating to a Question:

- To answer a question, do the following:
 - Click on the question number in the Question Palette at the right of your screen to go to that numbered question directly. Note that using this option does NOT save your answer to the current question.
 - Click on **Save & Next** to save your answer for the current question and then go to the next question.
 - Click on **Mark for Review & Next** to save your answer for the current question, mark it for review, and then go to the next question.

This is very much the same interface you see in most of the online examinations. This helps candidates get familiar with the examination and practice mock tests to perform best in the actual examinations.

The system is fault tolerant. If computer turned off in unforeseeable circumstances while you are attempting the question paper, the same will be resumed once you turn on the computer

and sign in to the application. You will be given the opportunity to resume the test by a message box as shown in the picture below. Clicking the 'Yes' button on the message box will resume the test.

This test window is automatically closed when the time gets up for all the sections. You can also manually close this window by clicking on the 'Submit' button. Next, you are presented with the following window which shows the statistics about the questions you have attempted.

Your marked response details are as given below:

English Quantitative Aptitude Reasoning Ability Section time: 27 sec

Question No. 1 Spent Time: 5 sec A+ A- H

Comprehension:
Seven people N, K, T, B, M, W and R have their weekly offs on different days of the week i.e. Sunday, Monday, Tuesday, Wednesday, Thursday, Friday and Saturday not necessarily in that order. Each of them has a liking for different cuisine i.e. Indian, Italian, Mexican, Chinese, Spanish, Continental and Thai, not necessarily in that order. K likes Thai food and gets his weekly off on Thursday. B likes Italian food and does not have off on Sunday. M has weekly off on Saturday and R has his weekly off on Tuesday. W likes continental food whereas the one who has weekly off on Monday likes Mexican cuisine. T does not like Spanish cuisine and has weekly off on Wednesday. The one who likes Indian food does not have a weekly off on Tuesday or Wednesday.

Question:
Who has a weekly off on Friday?

☐ T
☐ R
☐ W
☐ Data Inadequate
☐ None of these

Response Status:
Not Answered!

Answer:
None of these

Explanation:

Person	Offs	Cuisine
N	Monday	Mexican Cuisine
K	Thursday	Thai Food
T	Wednesday	Chinese
B	Friday	Italian Food
M	Saturday	Indian Food
W	Sunday	Continental
R	Tuesday	Spanish Food

1.7) The Concept of Joywings Dummy Exam

Joywings Dummy Exam panel is designed to practice the MCQ mock tests in physical books or PDFs (Here in after referred as Question books) on your computer. Generally, any mock test has two components – 1) The Question Paper and 2) The Answer Keys at the end of the question paper. Depending on the subject, the question paper is further divided into various sections. For example, in banking preliminary exams the question paper is generally divided into three sections like Reasoning, Quantitative Aptitude and English with each section having its own number of questions.

The Joywings Dummy Exam panel has three components -

1. The Dummy Test Format panel
2. The Dummy Test panel and
3. The Assessment Panel where you generate answer sheet.

These three components let you practice the mock tests irrespective of your study field and subjects.

1. The Dummy Test Format panel is where you specify the format of your question book like Name of the exam, Set Name, Number of sections, Number of options, Option indices (like I, II, III or a, b, c), exam time or section time, section names, questions per section, marks for correct answers, Negative marks for incorrect answers etc. and create the profile of this question book for the first time.
2. The Dummy Test panel is where you give the mock test. Here you answer or review questions in your question book with respect to their question numbers in the respective sections and click on 'Save and Next' or 'Mark for Review' button and save your answers within stipulated time.
3. The Answer Sheet Generator panel is a self-assessment component where you see all the answers given by you with respect to question numbers in respective sections. This panel also shows the time taken by you to solve questions. Here you match your answers with the answers given at the end of the question paper in your question book and click on checkboxes in the "Check Question" column to mark that you have checked the answers of those questions. If the answer is matched with your response, then you click on checkbox in the "If Correct" column to mark that answer as correct and your response text box turns green indicating your answers is correct. You repeat this process for every question you have answered in each section. Once all the answered questions' checkboxes are checked click on the "Process Score" button to generate answer sheet for score evaluation.

1.7.1) Steps for Dummy Test Format Panel

1. First you need to create the Profile for the mock test you want to practice. Click on the "Dummy Exam" button on Joywings QuestionBook Reader – Welcome window. Next, a Dummy Profile window with a text box is shown to enter the name of your new exam

profile. If you have created the exam profile earlier then that exam profile is shown in the Dummy Profile window. Let us assume that we have to practice a mock test on IBPS PO Preliminary Examination practice set given in some book. The exam has 3 sections as English with 30 questions, Reasoning with 35 questions and Quantitative Aptitude with 35 questions. Each section has individual time of 20 minutes. To practice this mock test, enter the name of the profile as something like e.g. "IBPS PO Pre Exam" and click on the "Create Profile" button as shown below in the picture.

1.7.2) Steps for Dummy Test Panel

The Question Palette displayed on the screen will show the status of each question using one of the following symbols:

You have not visited the question yet.

You have not answered the question.

You have answered the question.

You have NOT answered the question, but have marked it for review.

You have answered the question, but marked it for review.

The 'Marked for Review' status for a question simply indicates that you would like to look at that question again. If a question is answered and 'Marked for Review', your answer for that question will be considered for the evaluation.

IBPS PO Preliminary Examination 2020 Test 1

English

1) Comprehension:

Directions (1-5): Read the following passage carefully and answer the questions given below.

People have long known that the canine sense of smell is a powerful tool. Dogs lend their super snouts to help find missing people, illegal drugs, and even screen for diseases like malaria and cancer. Now, scientists say that dogs can add a new talent to their sniffing repertoire: detecting seizures. A small study has found that humans emit a distinct odour during epileptic seizures, and that some dogs can be trained to recognize the smell. In a newspaper published in ScientificReports this week, researchers show that trained service dogs could correctly identify seizure odours anywhere from 67 to 100 percent of the time. Some dogs had a 100 percent accuracy rate during the scent test, however, even lower-performing dogs could identify seizure odors at a rate that was better than random chance. The researchers say their study is the first to show that seizures do cause a detectable change in human body odour — and that dogs can be trained to use their powerful sense of smell to recognize it. The finding gives researchers and the 65 million people worldwide living with epilepsy new hope for the efficacy of seizure alert dogs. Many people who experience seizures anecdotally report that service dogs do help them manage some aspects of their condition. But until now, there has been little scientific evidence to support dogs' abilities to detect seizures.

The study included three female dogs and two male dogs of mixed breeds. The canines were adopted from shelters and trained to be disease-detection experts by Medical Mutts, a service dog training centre based in Indianapolis.

1. First observe the question in question paper in your book that you want to solve. Once you have decided to solve the question click on the respective question number button in the Question Palette of the respective section so that the timer starts counting the time you'll take to solve that question. Here the question number button turns red pentagon from white square.
2. Now solve the question and click on the particular option for that question as your answer.
3. Next click on the "Save & Next" button to save your answer and the red question number button turns green pentagon.
4. If you want to review the question later on then click on the "Mark for Review" button to save your answer. The question button turns into violet circle.
5. If the question is "Answered and Marked for Review" then it will be considered for evaluation. (Here the question number button turns into violet circle with right mark engraved in it.) If the question is NOT answered and "Marked for Review" then it will NOT be considered for evaluation (The violet circle button).
6. In case you want to remove your response on an 'Answered or Marked for Review' question then just click on that question number button, your response on respective option number appears. To delete the response just click on "Clear response" button and your response gets deleted and Question Number button turns red pentagon indicating question is only read.
7. The time taken by you to solve every question is automatically saved by the system.

8. Do not worry if your computer turns off during the dummy test due to power outage or some other technical problem. Next time you turn on the computer and login to the Joywings QuestionBook Reader, a message box appears asking if you want to resume your interrupted exam. Just click on Yes button and your dummy test resumes from the question you had left.
9. Your dummy test is submitted automatically once the time is up. In case you want to submit the dummy test earlier then click on the "Submit" button. All the responses are saved and you are moved to the Exam Summary panel. To assess your dummy tests, click on the "Generate Answer Sheet" button which opens the "Assessment Panel".

Your marked response details are as given below:

Sections	Unread	Read	Answered	Review	Answered & Review	Total
English	13	17	11	1	1	30
Reasoning Ability	35	0	5	0	0	35
Quantitative Aptitude	35	0	5	0	0	35
Total	83	17	21	1	1	122

Close

1.7.3) Steps for Assessment panel

This Assessment panel helps you to calculate your test score by comparing the answers given by you in the dummy test against the correct answers given at the end of your question book. In the beginning, the panel shows the responses for the questions which were either 'Answered' or 'Answered & Marked for Review' in each respective section. Please follow the instruction listed below to calculate your score:

1. Check the section and question number with the respective section and question number in the answer sheet at the end of your question book and mark the checkbox in the 'Check Question' column of the Assessment panel. This step indicates that you have checked the question.
2. If your response matches with the corresponding question's answer then mark the checkbox in the 'If Correct' column of the response panel. The textbox for the corresponding question number in the 'Your Answer' column turns green indicating that your response is correct.

Joywings - Dummy Exam

IBPS PO Preliminary Examination 202

Welcome to the Joywings QuestionBook Reader - Response Palette!

This is an Assessment panel which helps you to calculate your test score by comparing the answers given by you in the Mock test against the correct answers given at the end of your Question book. In the beginning, the panel shows the responses for the questions which were either Answered or Answered & Marked for review in each respective section. Please follow the instruction listed below to calculate your score:

- 1) Check the section and question number with the respective section and question number in the answer sheet at the end of your Question book and mark the checkbox in the 'Check Question' column of the Assessment panel. This step indicates that you have checked the question.
- 2) If your response matches with the corresponding question's answer then mark the checkbox in the 'Check if Correct' column of the response panel. The textbox for the corresponding question number in 'Your Answer' column turns green indicating that your response is correct.
- 3) If your response number does not match with the corresponding question's answer then do not mark the checkbox in the 'Check if Correct' column of the response panel.
- 4) This way, when all the checkboxes in the 'Check Question' column are marked, the corresponding textboxes in the 'Your Answer' column with green colour indicate the Correct Answers and the textboxes with white colour indicate the Incorrect Answers.
- 5) Once you have finished with all the question in each section, click on the breadcrumb button in the upper right corner and then click on the 'Progress Score' button. If you have checked all the questions, then a message box showing the message 'Answer sheet generated successfully!' appears. Click on the OK button on the message box and you will be directed back to the Score panel where you will be able to see your score.
- 6) If any question is left unchecked then the message box shows the message 'Check all the answers'. This means that some

Reasoning Ability	35	5	35	20 min 0 sec
Total	100	-	100	1 hrs

2. Joywings QuestionBook Editor

The Joywings QuestionBook Editor (JQE) edits the question papers and packages them into the question books. The question books are created in three steps.

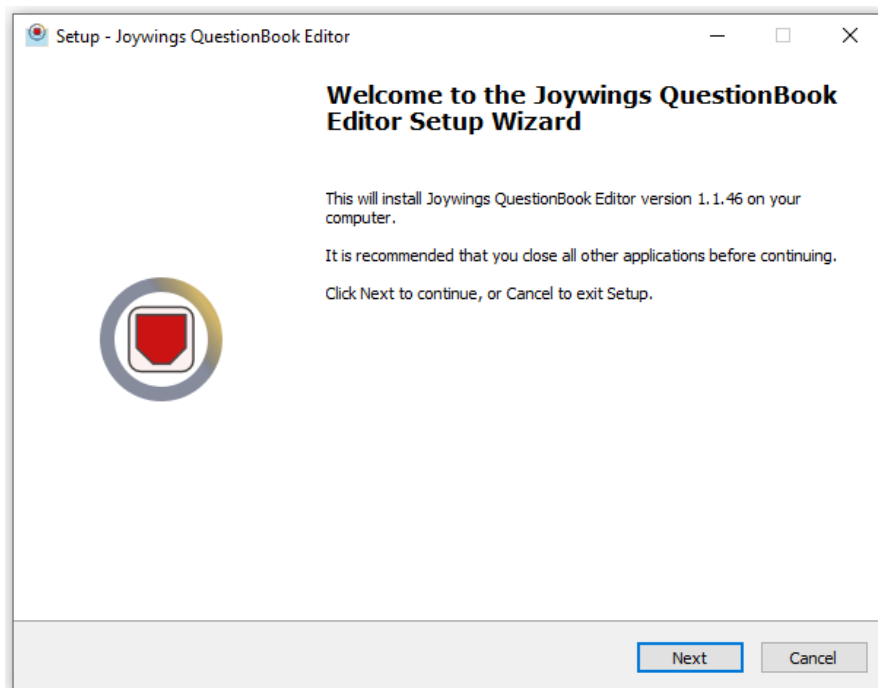

- i) Create the question paper in a word document.
- ii) Copy fields like comprehension, question, options, explanation, correct answer, marks, negative marks in the respective textboxes of the Joywings QuestionBook Editor and edit them according to the requirements (if necessary).
- iii) Export the question paper in .pxt file.
- iv) Package all the .pxt files and instructions into question book which has .pkg extension. This packaged file can be distributed to be run in the Joywings QuestionBook Reader (JQR).

2.1 System Requirements

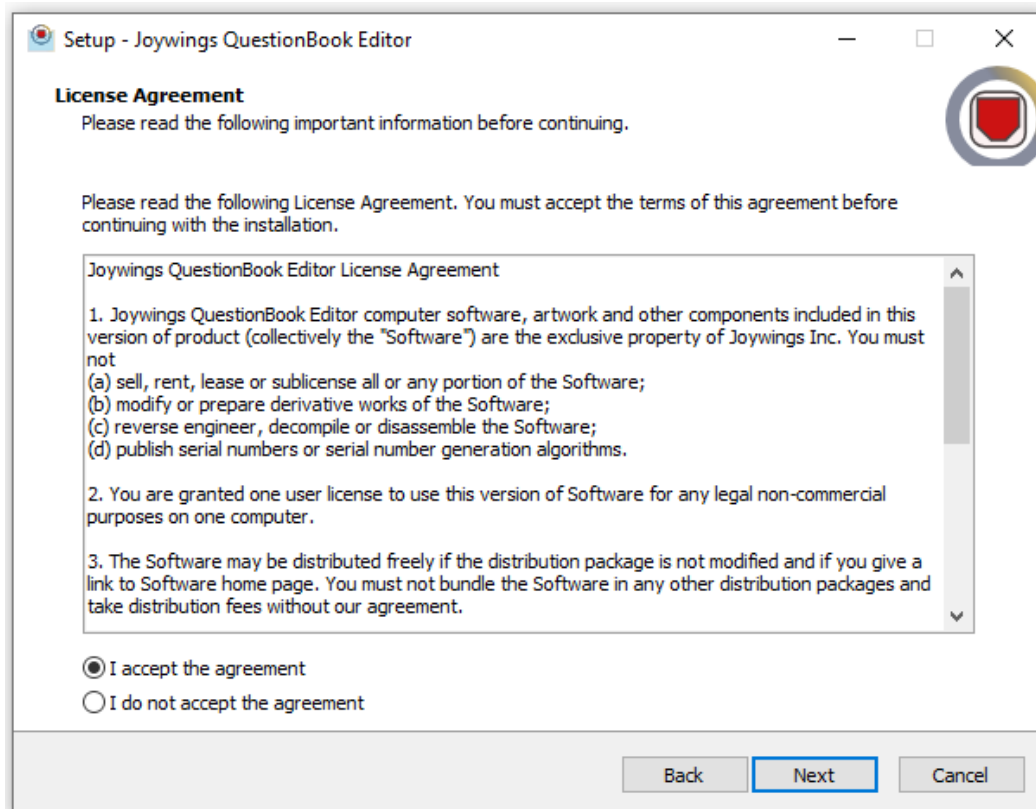

- i) A Windows computer with Intel Pentium 4 or higher. 2 GB RAM or higher.
- ii) Windows 7, Windows 8, Windows 8.1, Windows 10, Windows 11 operating systems supported.
- iii) Microsoft Office is required to be installed on user computer.

2.2 Installing the Joywings QuestionBook Editor

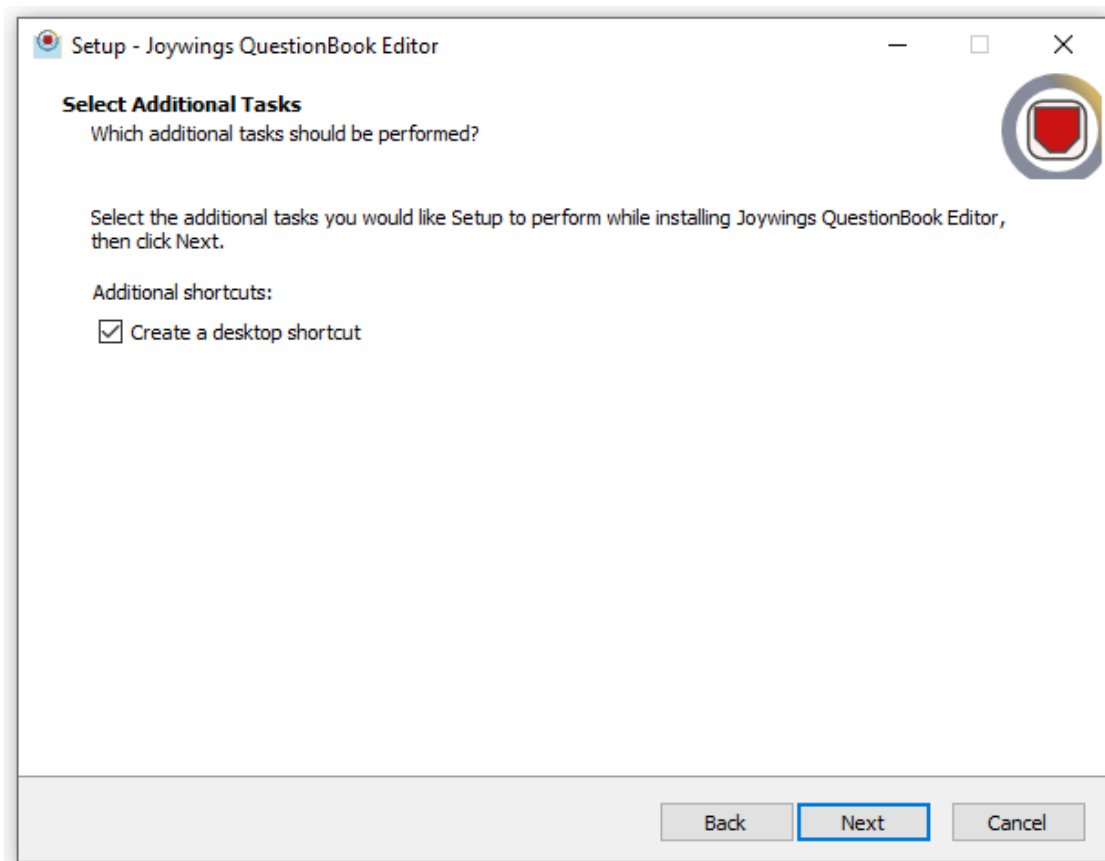

Click on the Joywings QuestionBook Installer file. The following setup window shows up –

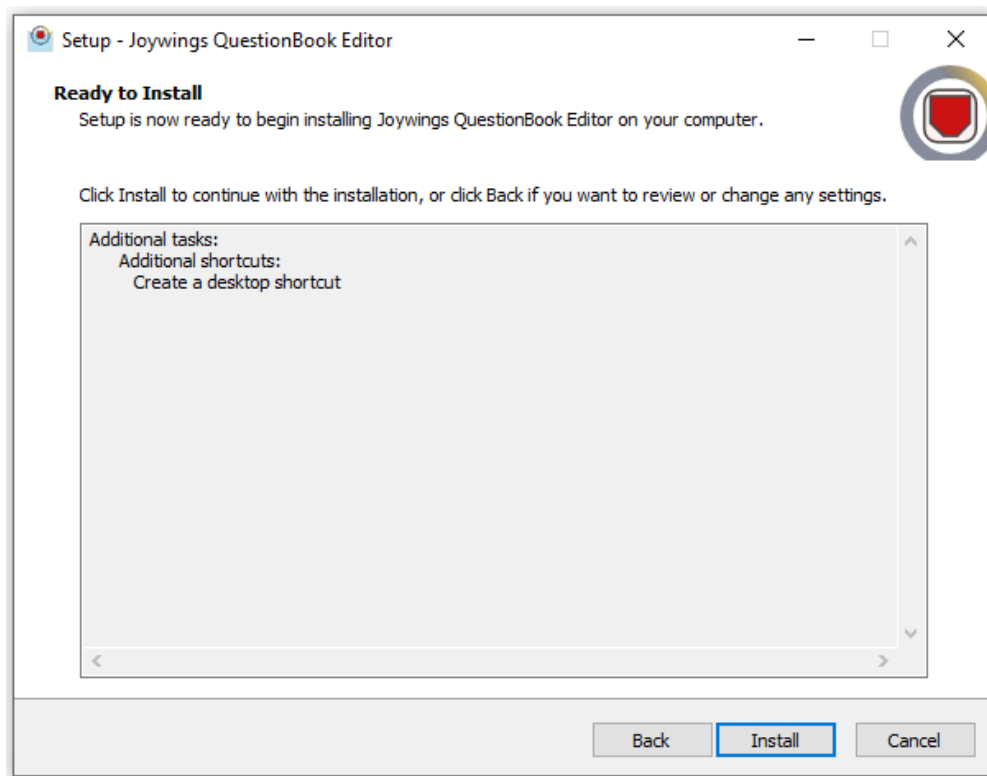

Click on the Next button. The following window appears –

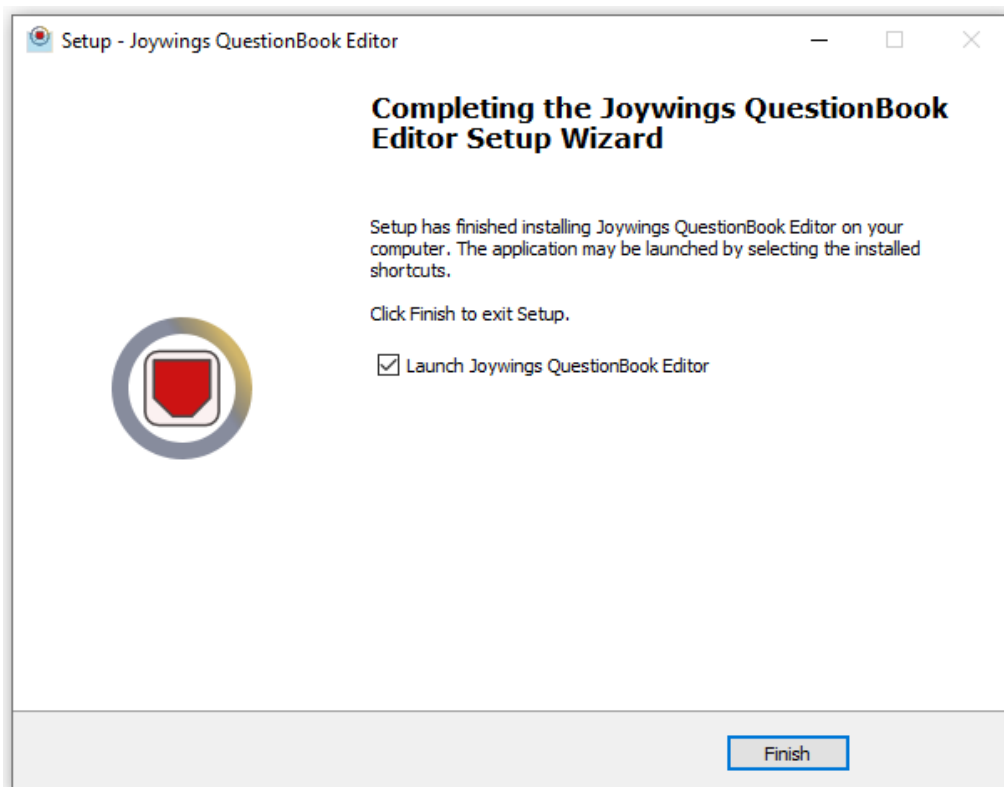

Read the license, select the 'I accept the agreement' radio button and click on the 'Next' button to reach to the following window –

Check the 'Create a desktop shortcut' checkbox if you want to create a shortcut of the application on the desktop and click on the 'Next' button to get to the following window –

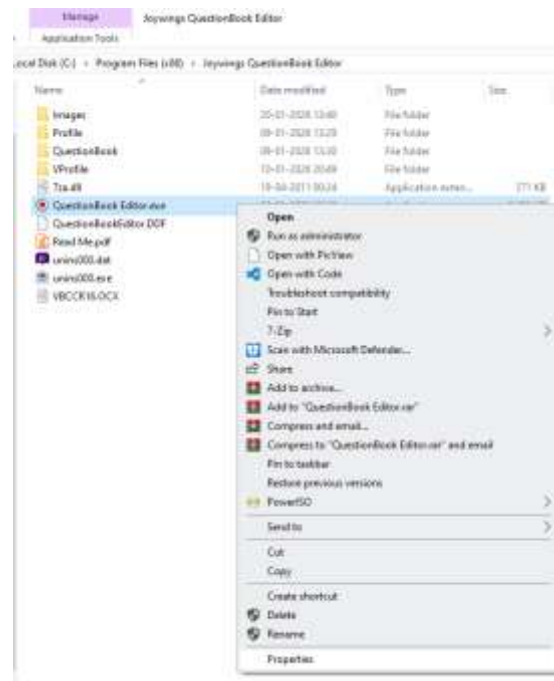

Click on the 'Install' button and the setup starts installing the application. When the application is successfully installed, the following window is displayed –

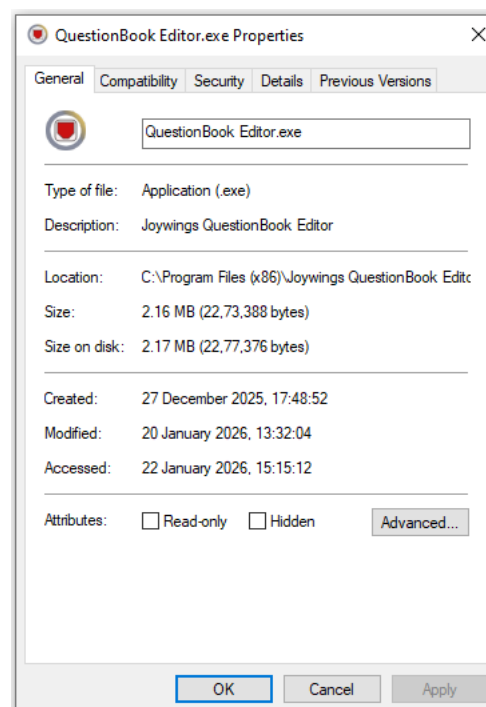

Please don't launch the application yet because it may not show itself properly on high resolution displays. Little tinkering in the application properties as given below are needed to correct the application display.

(Please close the application if it is already launched.)

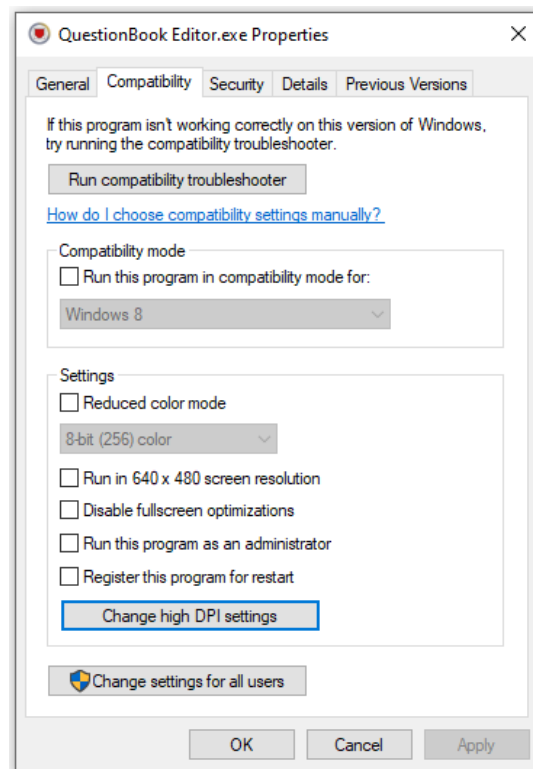

Navigate to the application installed location (e.g. 'C:\Program Files (x86)\Joywings QuestionBook Reader') and right click the 'QuestionBook Reader.exe' file and select 'Properties' from the popup menus as shown in the picture below.

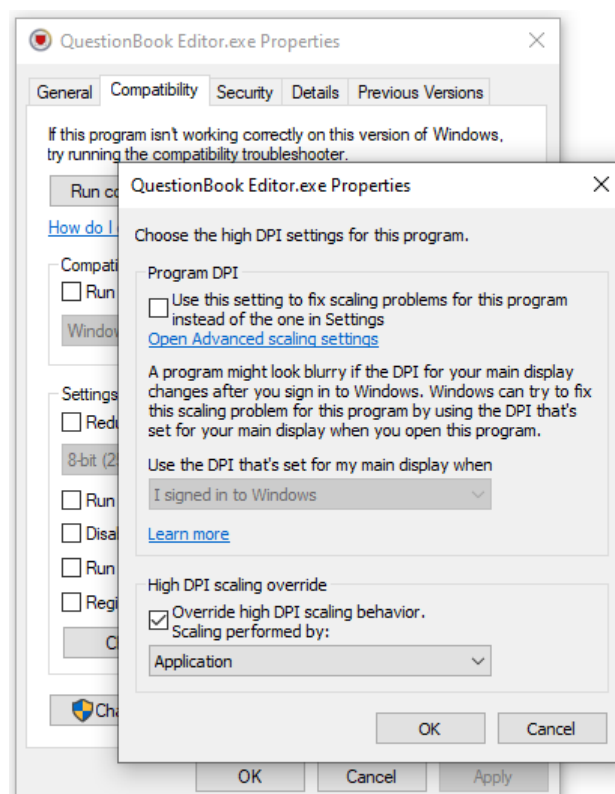

The 'Joywings QuestionBook Reader Properties' window opens up as shown below.

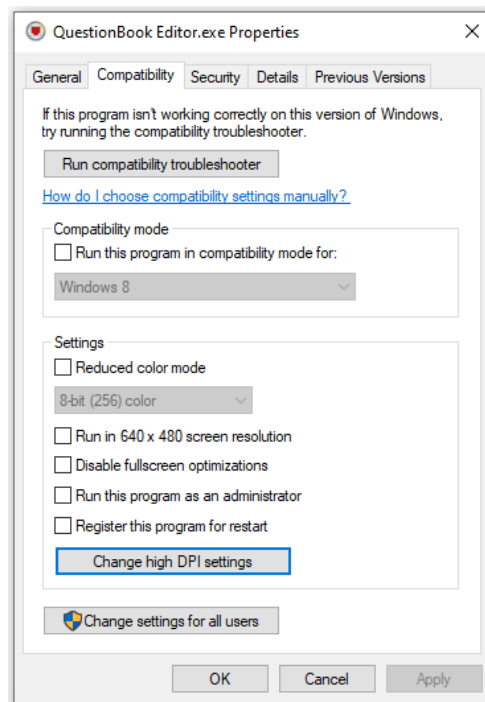

Now click on the 'Compatibility' tab as shown below. Next click on the 'Change high DPI settings' button.

In the following window check the 'Override high DPI scaling behavior.' Checkbox and select the 'Application' item from the combo box under 'Scaling performed by:' heading. Next click on 'Ok' button.

Next click on the 'Apply' button and then click on the 'Ok' button as shown in the picture below.

Now you may launch the application. But for the first time launch the application using administrative privileges. This action registers necessary dependencies and avoids any errors. Right click the application icon and select 'Run as administrator' from the context menu.

2.3 Getting started with the Joywings QuestionBook Editor

When the application is started for the first time it shows the Vendor Profile window as shown above. A vendor is any person or organization creating the QuestionBooks. A vendor information is integrated into the QuestionBooks to be available to display in the Joywings QuestionBook Reader to show the information about their creator. The picture size of the vendor is in the form of a banner. This picture must be a .jpg file with dimension 748px (Width) x 105px (Height) to show the banner properly in the Joywings QuestionBook Reader. This picture is embedded with the vendor information in the every QuestionBook package created by the application. Therefore, keep the size of the banner image typically within 50kb such that it does not affect the size of the QuestionBook package.

2.4 Creating the Question Paper

The Joywings QuestionBook Editor uses the Rich Text Format (RTF) to save, edit and display the questions. The questions can be written directly into the Joywings QuestionBook Editor but to make things easier the user should write the question in the MS Word and then just copy the questions from MS Word and paste into the Joywings QuestionBook Reader.

For example, let us create a question paper with the following configuration –

Section Name	Number of Questions	Number of Options	Time
Section 1	30	5	1 hour
Section 2	30	5	

To begin with first create the question paper in the following format –

Test Name – Example Test

Set Name – Set 1

Section 1

Question No. 1

Comprehension

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed dictum nisl est, eu cursus urna tempor id. In scelerisque nunc eget congue facilisis. Proin tincidunt turpis ut enim ullamcorper, vitae pulvinar orci facilisis. Integer at porttitor tellus. Sed ut euismod tellus. Vivamus placerat quis ex eu accumsan. Aenean a justo et sem porta lacinia. Phasellus lobortis ultrices metus sed fermentum. Pellentesque justo velit, hendrerit pharetra turpis id, eleifend tempor massa. Donec semper, leo at tristique dignissim, elit ligula blandit urna, eu varius diam magna nec ante. Aenean non blandit lorem, sit amet ultricies odio. Nam eget tincidunt lectus. Cras venenatis posuere odio ac varius. Vestibulum ut sapien interdum, suscipit metus eget, cursus eros.

Question

Suspendisse ac quam et nisi auctor efficitur in sed orci?

Options

- 1) Ut ligula ante
- 2) Suscipit fermentum tempor non
- 3) Scelerisque sed turpis
- 4) Aenean molestie lorem quis justo elementum porta
- 5) Nunc dictum tempor arcu eu dapibus

Answer 3

Explanation

Vestibulum quis erat a ipsum volutpat accumsan. In pretium justo nisi, non malesuada libero gravida a. Donec et pulvinar ex, id cursus metus. Nam mollis enim turpis, eget euismod tellus lacinia ut. Mauris vitae nulla vitae metus congue laoreet id id ipsum. Duis malesuada mauris at urna ultrices facilisis. Phasellus aliquet ante massa, sit amet euismod leo sagittis eget. Phasellus porttitor eros nec felis interdum elementum.

Answer

Explanation

Now let us convert this MS Word document into a question paper in the Joywings QuestionBook Editor. Open the Joywings QuestionBook Editor, click on the 'File' menu and select the 'New QuestionPaper' submenu as shown below.

The following window appears –

New QuestionPaper Version 1.1.38

Joywings QuestionBook Editor

Exam Name

Set No.

No. of Sections

Settings

☐ Continuous Question numbers

☐ Each section has separate time

☐ Indices only options

	Section Name	Max Questions	Max Options	QN Start
1	Section 1		4	1
2	Section 2		4	1
3	Section 3		4	1
4	Section 4		4	1
5	Section 5		4	1

Now let's quickly add the configuration of our example test in this 'New QuestionPaper' window.

New QuestionPaper Version 1.1.38

Open Profile
Create Test
Cancel

Let us have a little idea of the settings section of this window –

2.4.1) Continuous Question numbers checkbox –

Generally, the questions in each section start with the question number 1. Checking this checkbox changes this setting and each question number in each subsequent section continues where the question number in the previous section ended. For example, if the question number in Section 1 ended with number 30 then the question numbers in Section 2 will start from number 31 if this checkbox is checked.

2.4.2) Each section has separate time –

By default, the tests have common time for all the sections and user can switch from one section to another within that time. Checking this section will extend the window and allow to specify individual time for each section. All the sections except the first for such tests will be locked for respective time intervals and will be unlocked sequentially as the time of previous sections end. However, a candidate giving such test can switch to next section by clicking the Submit button.

2.4.3) Indices only options –

By default, the options in the test can contain plain text with any number of characters. But for options containing formatted text or images, it is advised to declare such options in the question itself and show only the indices (e.g. 1,2, 3, 4, 5 or A, B, C, D, E or I, II, III, IV, V) of such options in the Options Frame. Such options are shown in the horizontal alignment below the Question frame in the simulator as well as in the Joywings QuestionBook Reader. Check

this checkbox if the options text is included in the question itself and the options frame is to show only indices of such options. The difference is shown in the pictures below –

Default options -

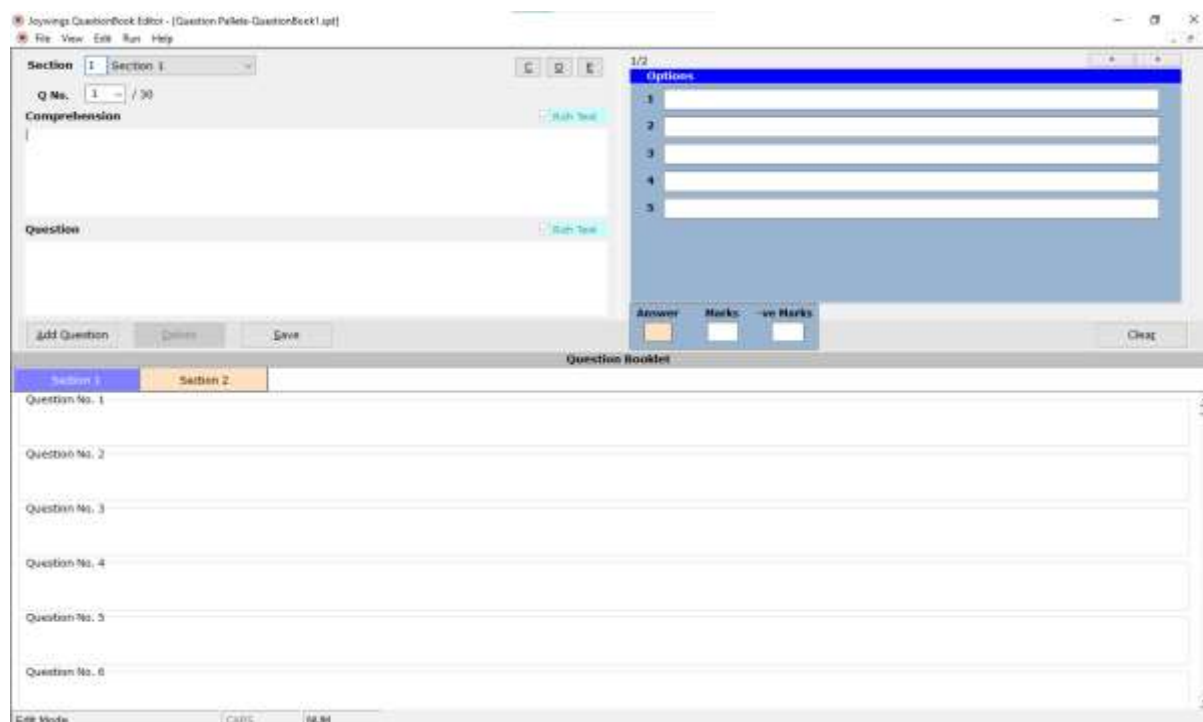

When the 'Indices only options' is checked -

2.4.4) 'Open Previous' button

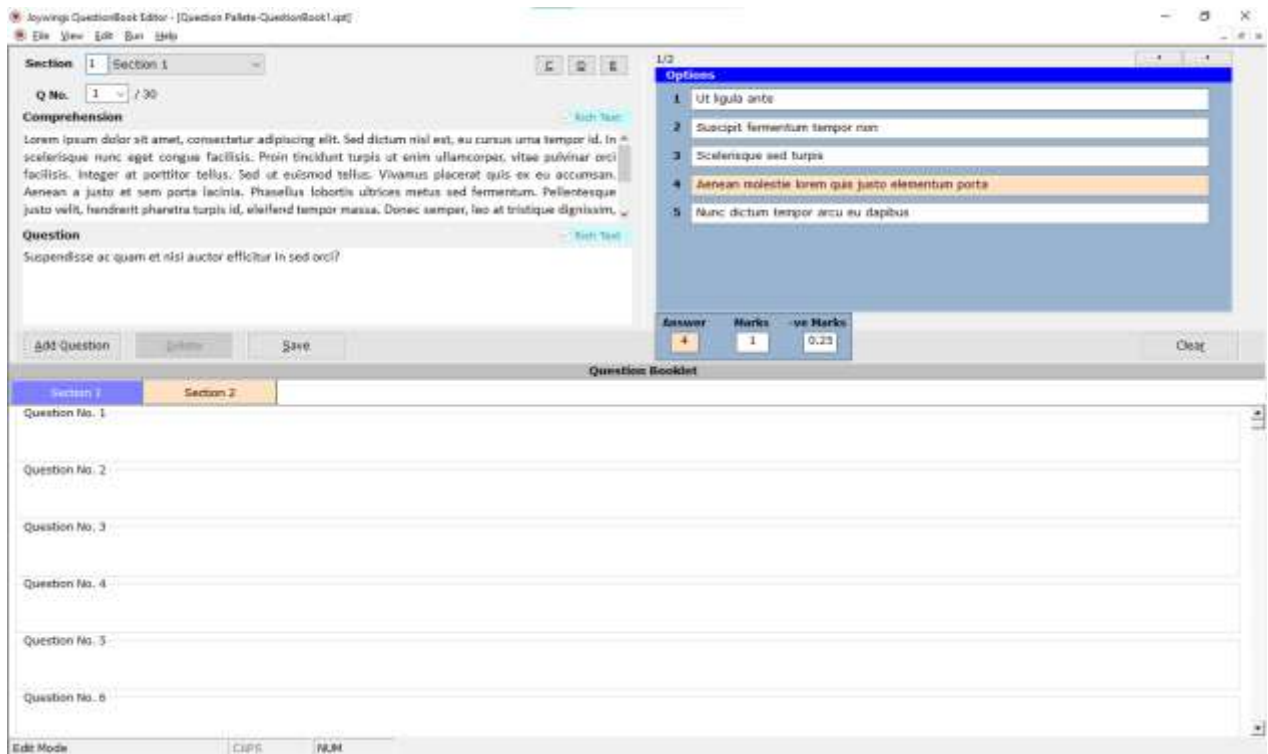

The 'Open Previous' button opens the dialog box for selecting previously created question paper and imports its configuration to create a new question paper based on the selected question paper.

Click on the 'Create Test' button to create a question paper. The following question paper editor window appears.

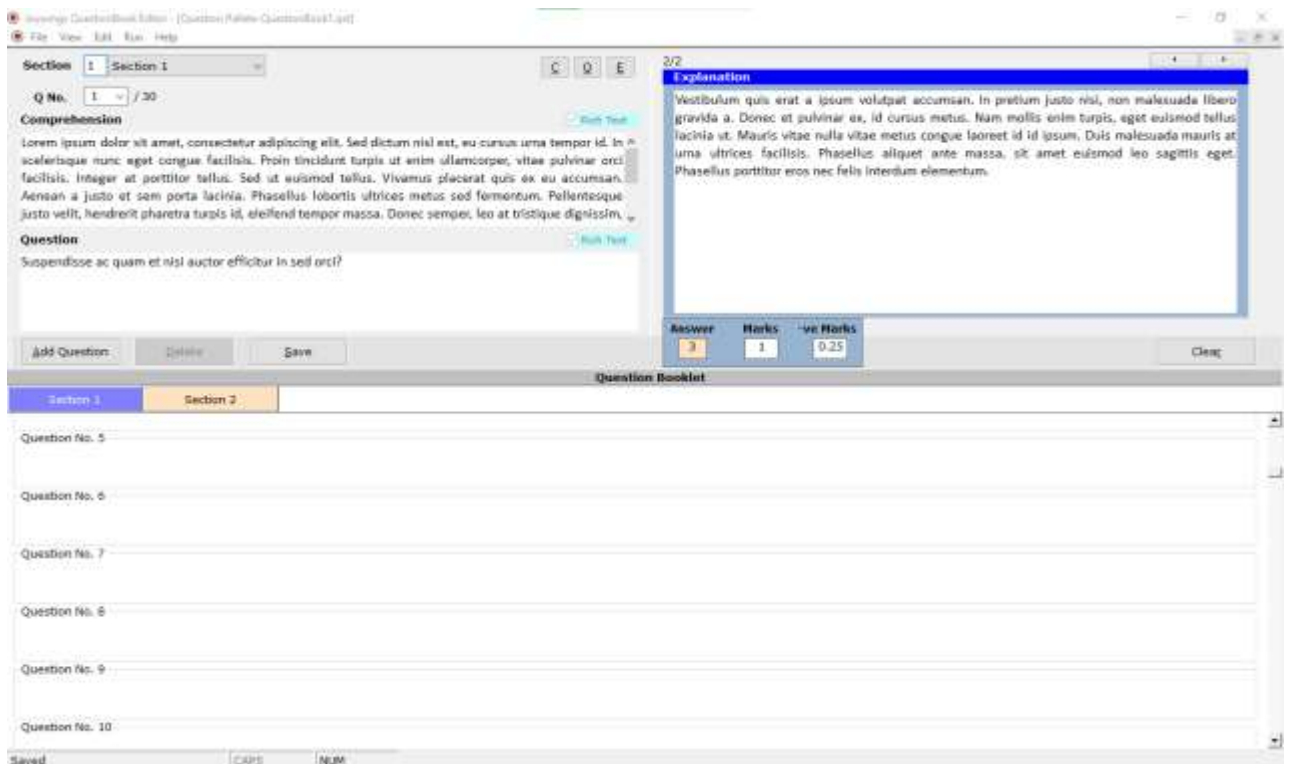

2.5 Editing the QuestionPaper

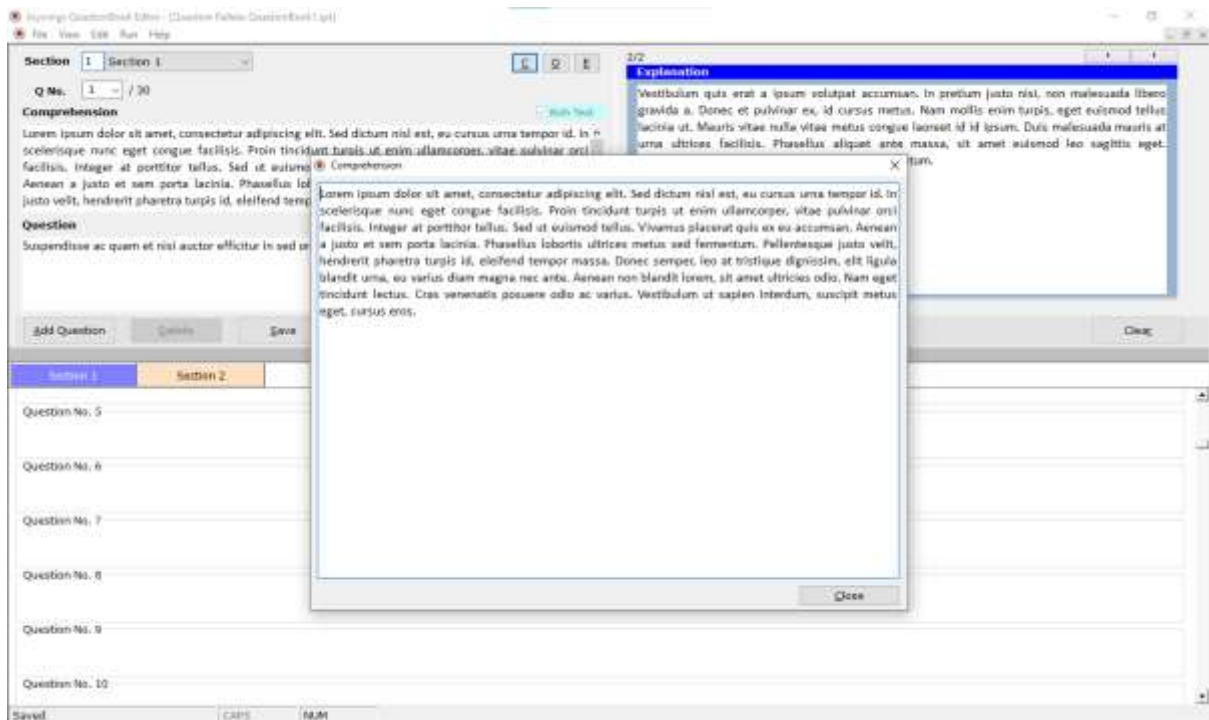

The questions are edited, updated or deleted in the upper frame. The lower frame called 'Question Booklet' displays the existing questions in the question paper for the update purpose. Let us add the first question in the first section of our Set 1 of Example Test. We just copy the text in MS Word and paste in the respective fields of the editor window to create a question. Select Section 1, Question No. 1 and paste the comprehension from Question 1 in the MS Word document to the Comprehension field of the editor. Similarly copy and paste question, options and explanation in the respective fields of the editor as follows.

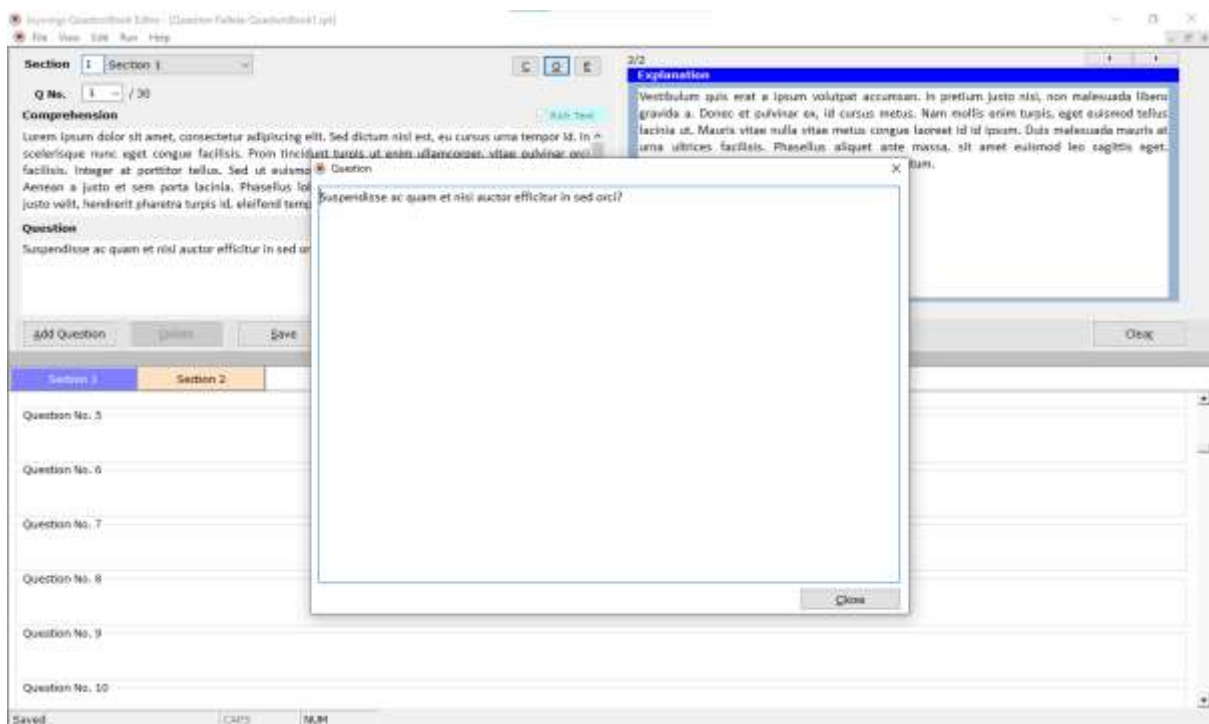

The explanation is added by clicking on the right arrow just above the options frame as shown below –

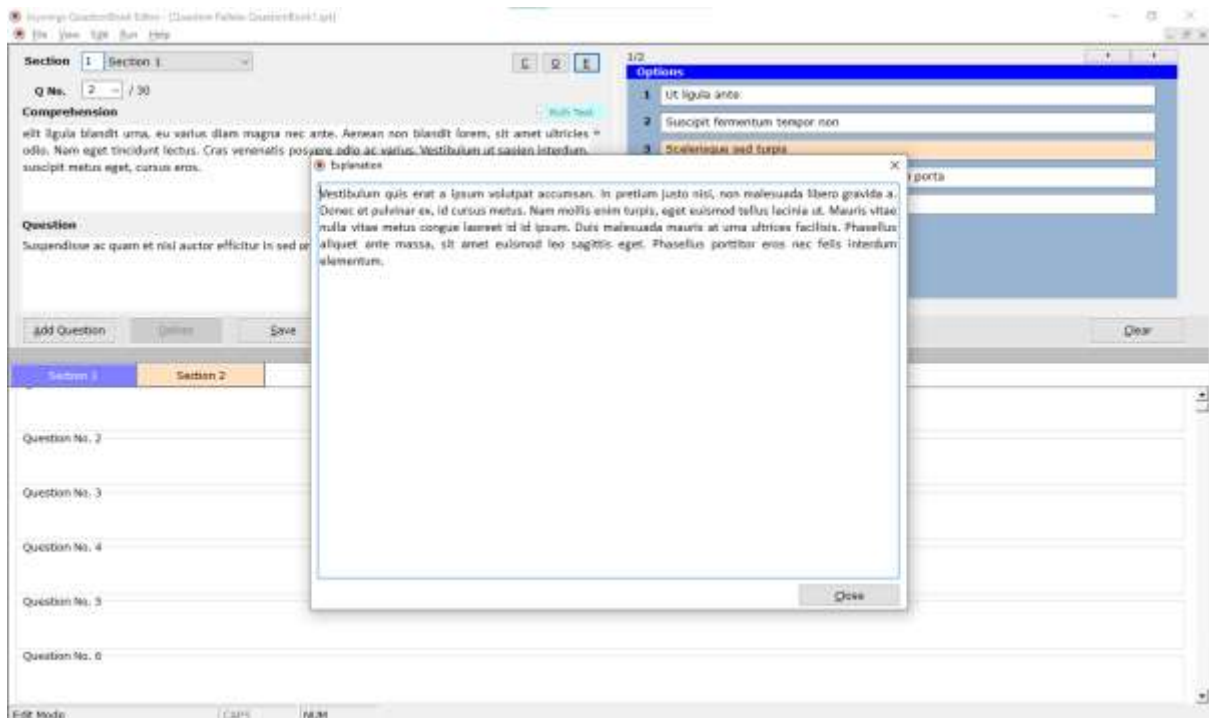

Clicking on the button 'C' or pressing 'Alt + C' opens the comprehension in a new window for editing as shown below –

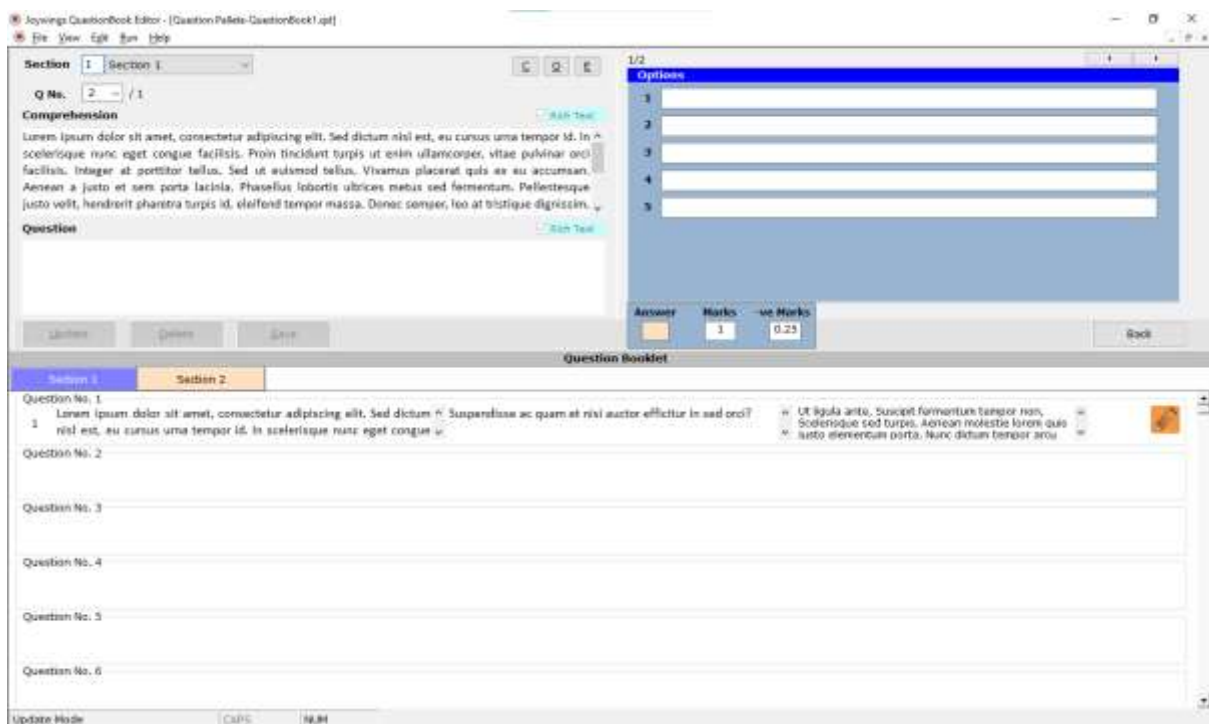

Clicking on button 'Q' or pressing 'Alt + Q' opens the question in a new window for editing as shown below –

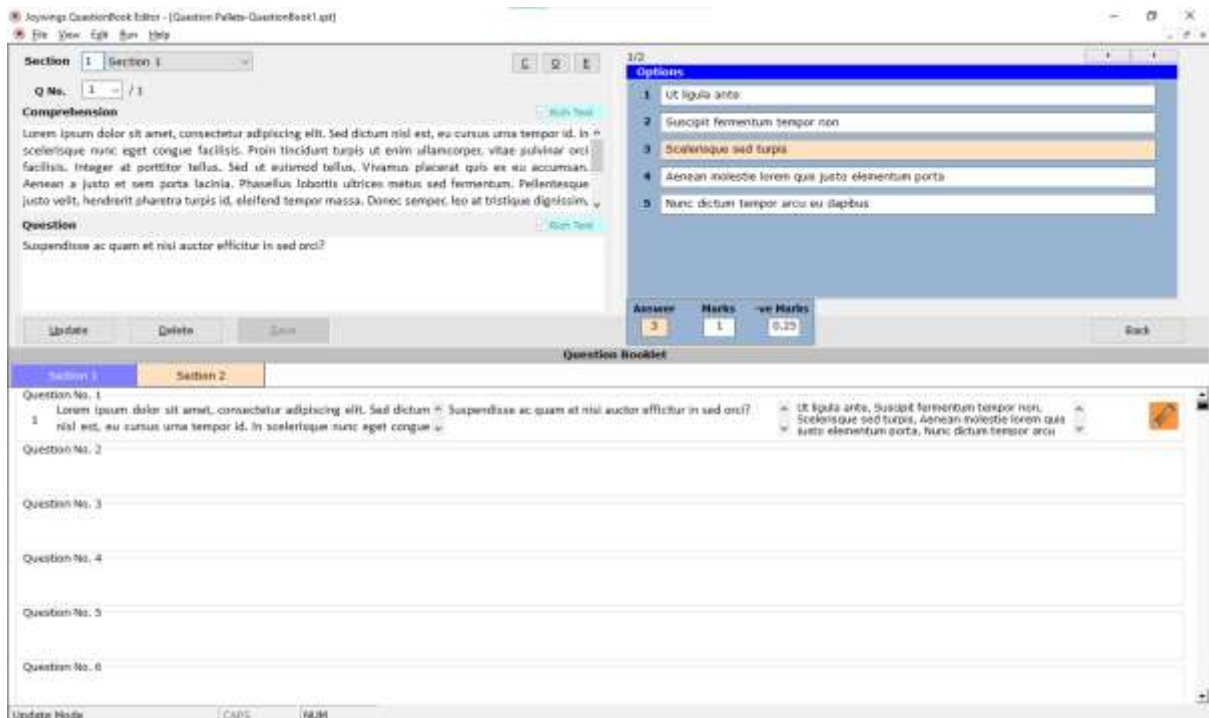

Clicking on the button 'E' or pressing 'Alt + E' opens the explanation in a new window for editing as shown below –

Click on the 'Add Question' button to add the question in the question paper. The question added shows up in the Question Booklet frame with respective question number as shown in the picture below –

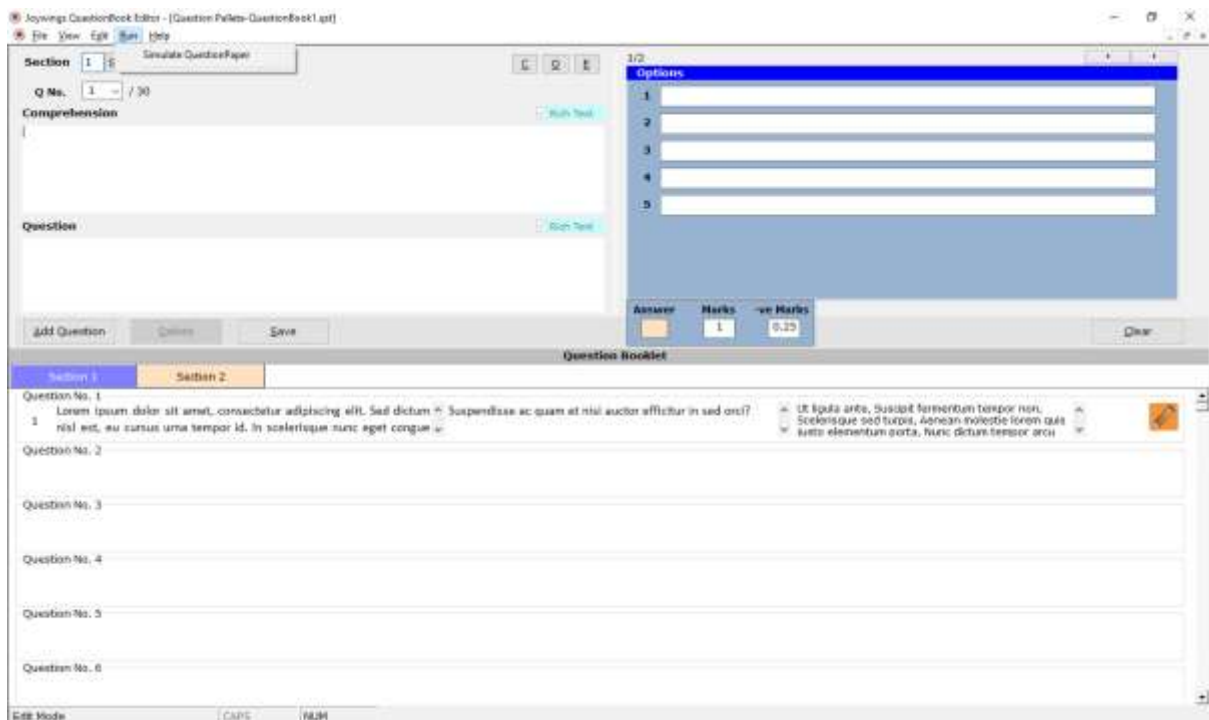

Clicking on the pencil button on a particular question in the Question Booklet frame opens that question for Update or Delete mode as shown in the picture below –

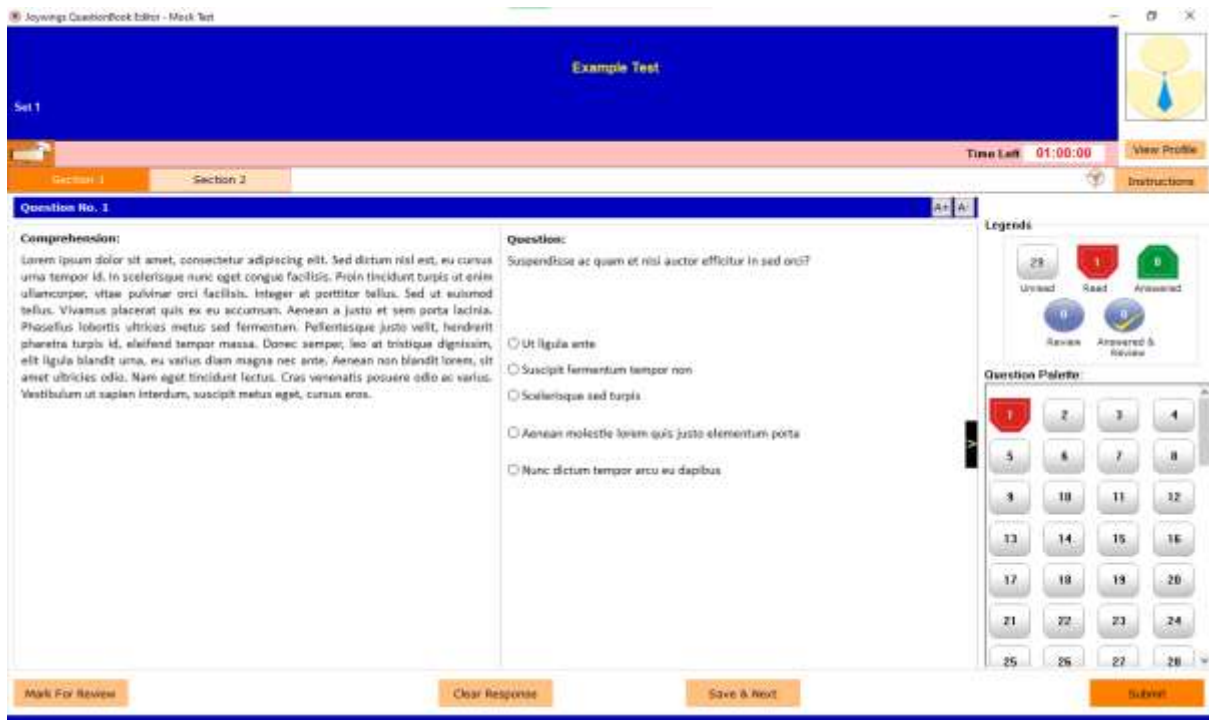

Once you have updated or deleted the question, click on the Back button to return to the Edit Mode to add new questions.

Since we have added a question in the question paper, we are now ready to simulate our question in the simulator. This feature shows us how our question will look in the test window on a candidate computer. Click on the Run menu and select Simulate QuestionPaper submenu to simulate the question paper.

The simulator with the above test configuration opens up as shown in the picture below –

Now let's add question no. 2 whose comprehension is empty and see what happens.

If the comprehension is left empty then the comprehension frame in the simulator hides and question frame extends as shown in the picture above.

Please note that the timer in the simulator is stopped. The timer only runs in the actual test in the Joywings QuestionBook Reader. The explanation cannot be seen in the simulator currently but this feature will be added to the upcoming version of the Joywings QuestionBook Editor.

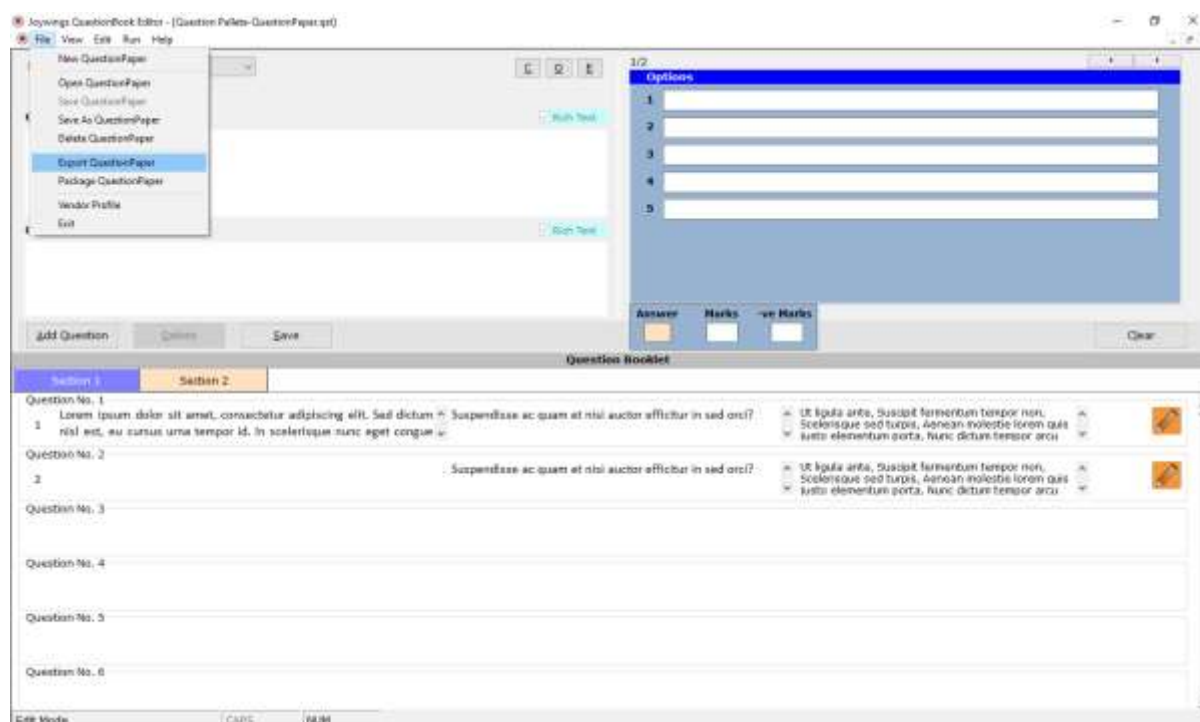

2.6 Exporting the QuestionPaper

Every question paper edited in Joywings QuestionBook Editor is comprised of three files in a single folder –

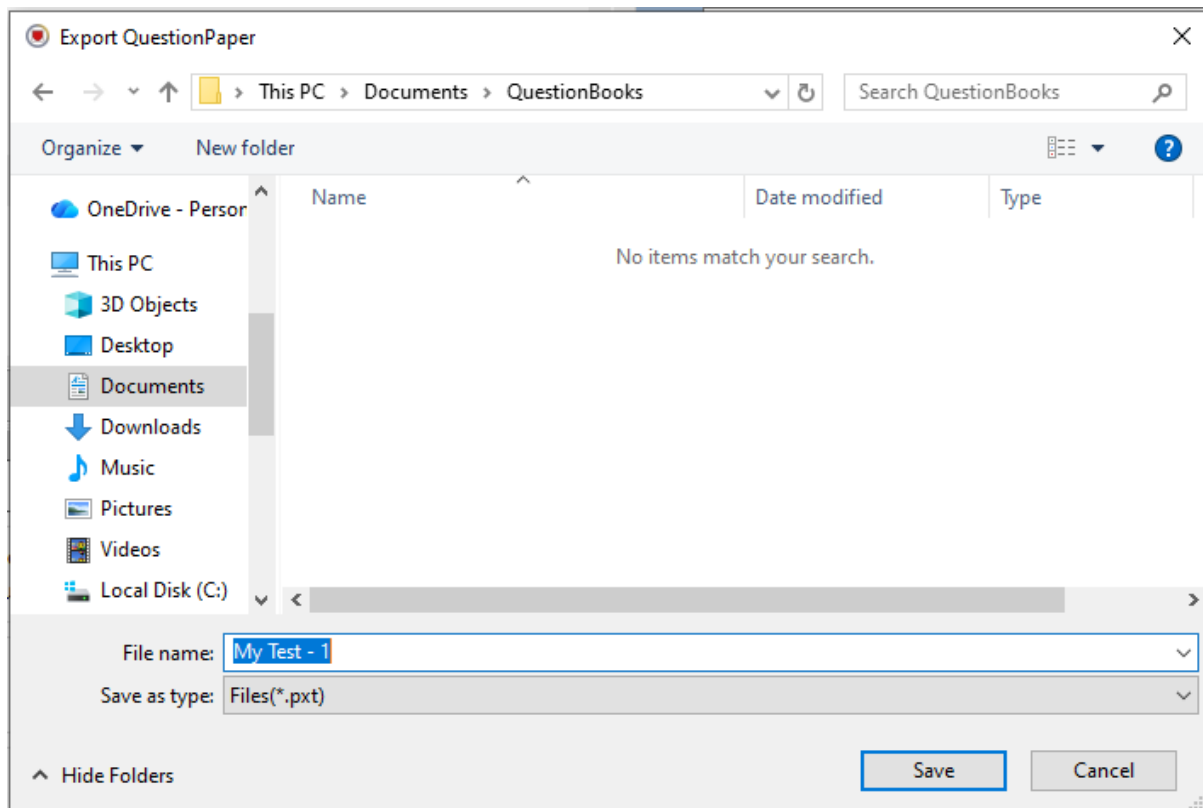

- i) QuestionPaper.qst
- ii) QuestionPaper.qst.ans
- iii) QuestionPaper.qst.exp

Please make sure that these three files with same name but different extensions - .qst, .ans and .exp are in the same folder. Double clicking the ‘.qst’ file opens the question paper in the Joywings QuestionBook Editor.

Once all the questions in all of the sections are written, the next step is to export the question paper into the “.pxt” file. Click on the File menu and select ‘Export QuestionPaper’ submenu as shown below –

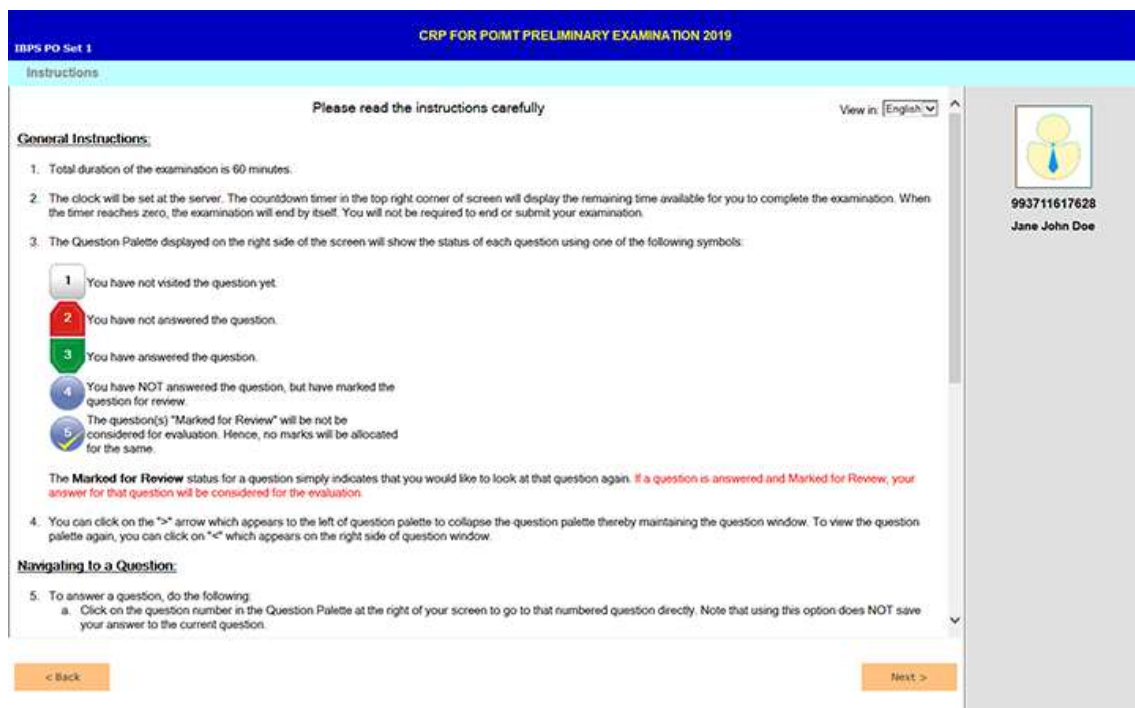

A dialog box opens up to export the question paper as shown below. Give the exported file a suitable name and place it in a specific folder such that all the exported question papers reside in a single folder so that they can be packaged later into a single file for distribution. The name of the ‘.pxt’ file is important because this name appears as the question paper name on the candidate computer in the Joywings QuestionBook Reader. So, make sure that names are written sequentially like Test Name 1, Test Name 2 and so on.

2.7 The Instructions

The instructions for the question paper are shown in 3 places in the Joywings QuestionBook Reader –

- i) Instructions 1 – These instructions contain the information about the legends and navigation of the test. They are shown before the beginning of the test as shown in the picture below.

- ii) Instructions 2 – These instructions contain the information about the sections, number of questions and maximum marks etc. They are shown when the 'Next' button in the Instructions 1 window is clicked as shown below.

IBPS PO Set 1
CRP FOR POINT PRELIMINARY EXAMINATION 2019

Other Important Instructions

Other Important Instructions

1. The details of the exam are as given below -

Sr. No.	Name of Test	No. of Qs	Max Marks	Duration
1	English	30	30	20 minutes
2	Quantitative Aptitude	35	35	20 minutes
3	Reasoning Ability	35	35	20 minutes
Total		100	100	60 minutes

2. You can attempt any question in the section for the prescribed time.

3. Each question has five options out of which only one option will be correct.

4. Each question has 1.00 marks. For each wrong answer 0.25 negative marks for the given question will be deducted.

5. One question will be displayed on the screen at a time. You are requested to be aware of the amount of time you spend per question. Do not spend too much time on any question.

6. Do not touch any of the keyboard key during exam as this will lock the exam.

I am ready to begin

- iii) Full Instructions – These instructions are the combination of the Instructions 1 and the Instructions 2. These instructions are displayed during the test when the candidate clicks the 'Instructions' button on the upper right corner.

Instructions
Close

Please read the instructions carefully

View in: English

General Instructions:

- Total duration of the examination is 60 minutes.
- The clock will be set at the server. The countdown timer in the top right corner of screen will display the remaining time available for you to complete the examination. When the timer reaches zero, the examination will end by itself. You will not be required to end or submit your examination.
- The Question Palette displayed on the right side of the screen will show the status of each question using one of the following symbols.

1

You have not visited the question yet

2

You have not answered the question.

3

You have answered the question.

4

You have NOT answered the question, but have marked the question for review.

5

The question(s) "Marked for Review" will be not be considered for evaluation. Hence, no marks will be allocated for the same.

The **Marked for Review** status for a question simply indicates that you would like to look at that question again. **If a question is answered and Marked for Review, your answer for that question will be considered for the evaluation.**

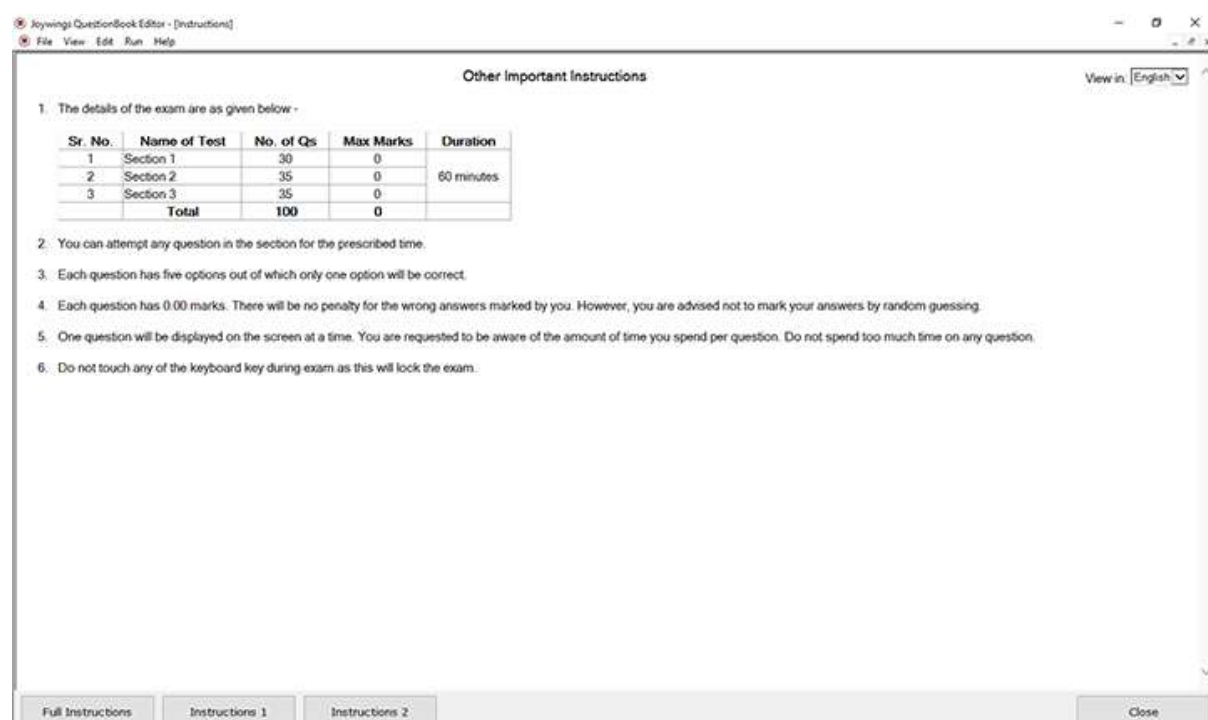

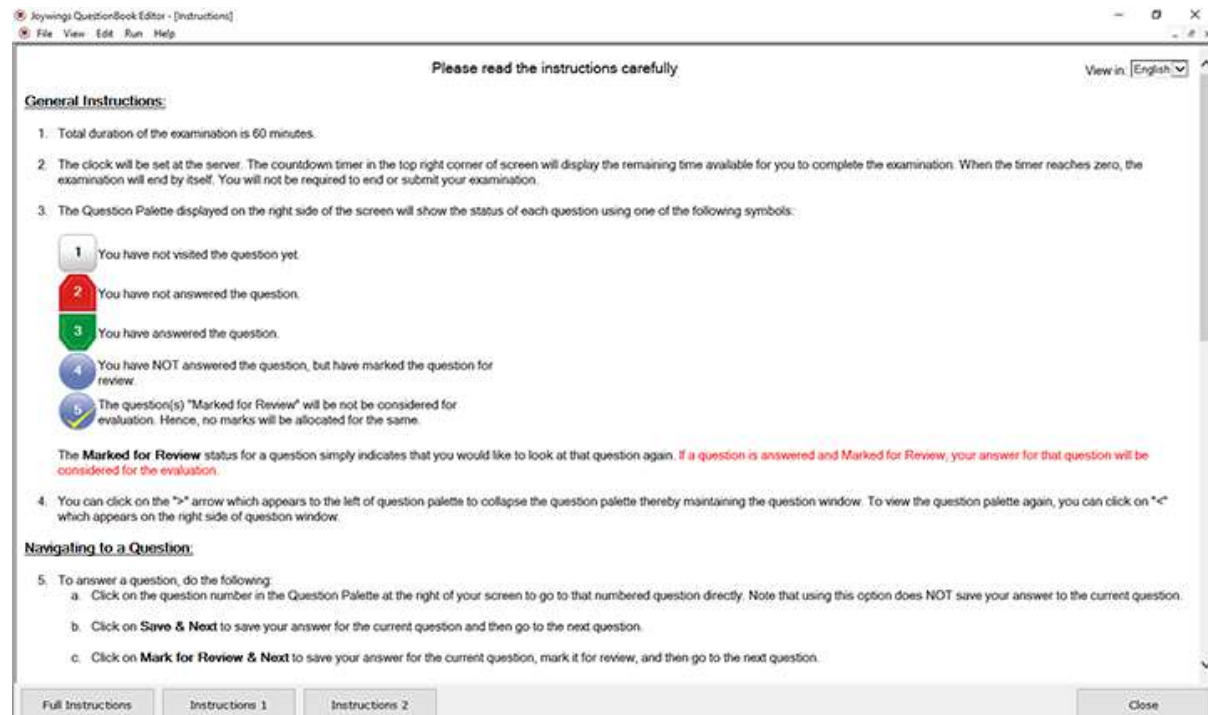

- You can click on the ">" arrow which appears to the left of question palette to collapse the question palette thereby maintaining the question window. To view the question palette again, you can click on "<" which appears on the right side of question window.

Navigating to a Question:

- To answer a question, do the following:
 - Click on the question number in the Question Palette at the right of your screen to go to that numbered question directly. Note that using this option does NOT save your answer to the current question.
 - Click on **Save & Next** to save your answer for the current question and then go to the next question.
 - Click on **Mark for Review & Next** to save your answer for the current question, mark it for review, and then go to the next question.

The instructions for the question paper are generated automatically by the Joywings QuestionBook Editor when the QuestionBook package is created.

To view the instructions while creating the question paper click the 'View' menu and click the 'Instructions' submenu. The instructions window shows up as shown below –

Please note that the 'Max Marks' column in the table of clause 1 and clause 4 of 'Other Important Instructions' change as the questions are added and marks are assigned to them in the question paper.

2.8 Packaging the question papers into a QuestionBook

To package QuestionPapers into a QuestionBook following contents are required –

i) A vendor profile

- A vendor profile created by clicking 'File' menu and selecting 'Vendor Profile' submenu.

ii) Package introduction image

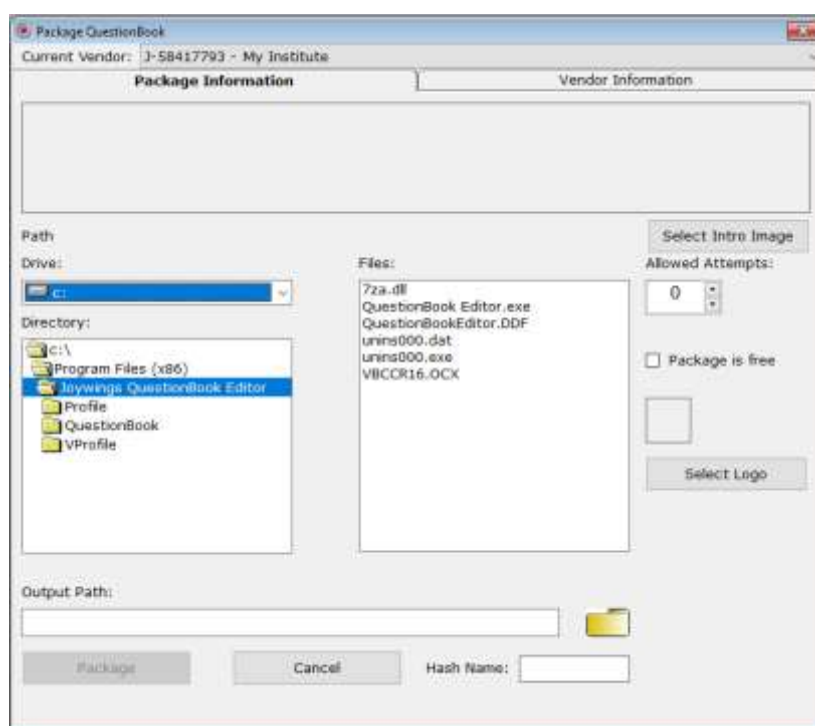

- A '.jpg' image of dimensions 748px x 105px shown when a candidate imports the QuestionBook in the Joywings QuestionBook Reader.

iii) Package logo

- A '.jpg' image of dimensions 45px x 45px shown with the QuestionBook name in different pages of the Joywings QuestionBook Reader.

Keep all the exported question papers ('.pxt' files) in the same folder. Please note that the Joywings QuestionBook Reader identifies the question papers by the name of the files. Therefore, the name of the '.pxt' files is very important.

Once everything is set up click on the 'File' menu and select 'Package QuestionPaper' submenu in the Joywings QuestionBook Editor to view the following window –

Now, select the drive where the directory (folder) of question paper(s) is located. Next, select the folder of question papers in the Directory list. All the question papers are shown up in the

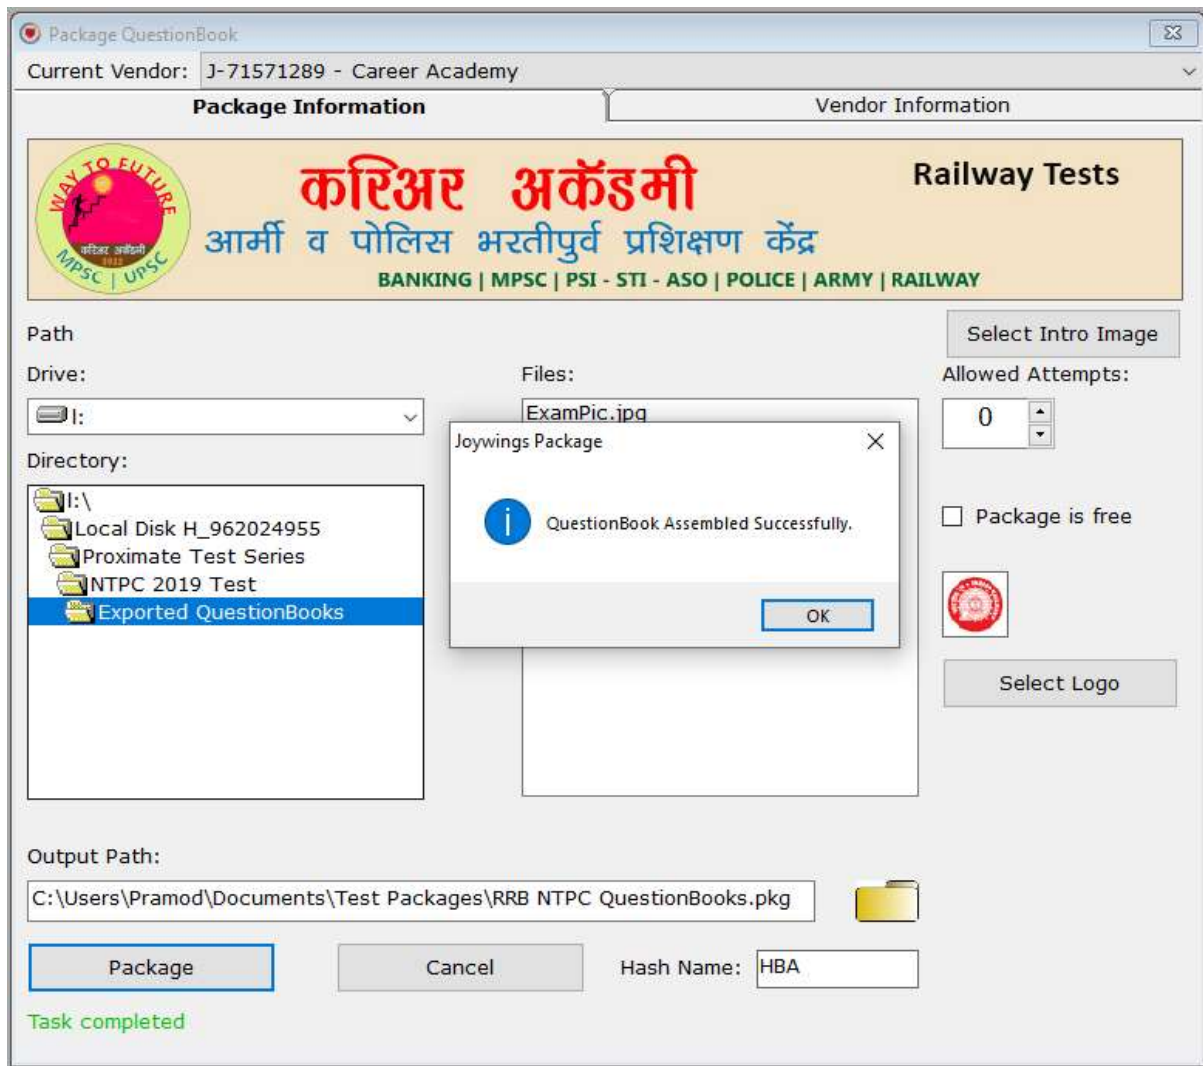

Files list. Now, select vendor in Current Vendor combo box. Next, select the QuestionBook introduction image by clicking on the 'Select Intro Image' button. Select the QuestionBook logo image by clicking on the 'Select Logo' button. Enter the number of allowed attempts per question paper. Check 'Package is free' checkbox if the package is free. No serial number will be required for such free package when the candidate imports the QuestionBook in the Joywings QuestionBook Reader but the number of question papers in such a free package cannot be more than 3.

Finally select the Output Path where the QuestionBook Package will be assembled. Altogether all this configuration looks like the picture shown below –

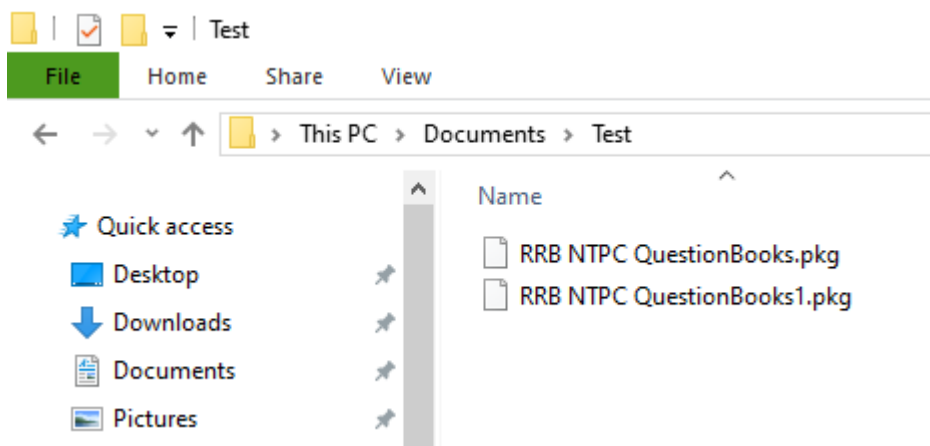

The screenshot shows the 'Package QuestionBook' window with the following configuration:

- Current Vendor:** J-71571289 - Career Academy
- Package Information:**
 - Intro Image:** A circular logo with 'WAY TO FUTURE' and 'MPSC | UPSC' text.
 - Header Text:** करिअर अकॅडमी, आर्मी व पोलिस भरतीपुर्व प्रशिक्षण केंद्र, Railway Tests
 - Footer Text:** BANKING | MPSC | PSI - STI - ASO | POLICE | ARMY | RAILWAY
- Path:**
 - Drive:** I:
 - Directory:** Local Disk H_962024955, Proximate Test Series, NTPC 2019 Test, Exported QuestionBooks (selected)
- Files:** RRB NTPC 1.pxt, RRB NTPC 2.pxt, RRB NTPC 3.pxt
- Allowed Attempts:** 3
- Package is free:** ☐
- Select Logo:** A red circular logo with a white emblem.
- Output Path:** C:\Users\Pramod\Documents\Test Packages\RRB NTPC QuestionBooks.pkg
- Buttons:** Package, Cancel, Hash Name: HBA

Click on the Package button and the QuestionBook package file with '.pkg' extension is created at the Output Path as shown below -

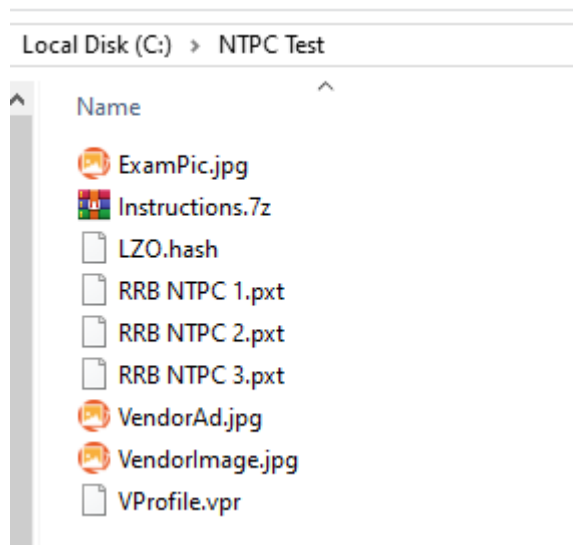

For each package there are two files created as shown below. The first file with the name given in the Output Path is the distributable file for the candidates. The other file with number 1 at the end is called the Activator file. This file must be kept private by the user. This Activator file is used by the Joywings QuestionBook Activator to generate activation serial number based on the key generated on the candidate computer at the time of importing this QuestionBook.

2.9 The Hash file

After the completion of the new package, the folder containing the '.pxt' question papers contains 5 additional files as shown below.

The description of these files is as given below –

i) ExamPic.jpg

- This is the logo of the QuestionBook selected while packaging.

ii) VendorAd.jpg

- This is the Introduction image of the QuestionBook selected while packaging.

iii) VendorImage.jpg

- This is the image of the vendor as uploaded while creating the vendor profile.

iv) VProfile.vpr

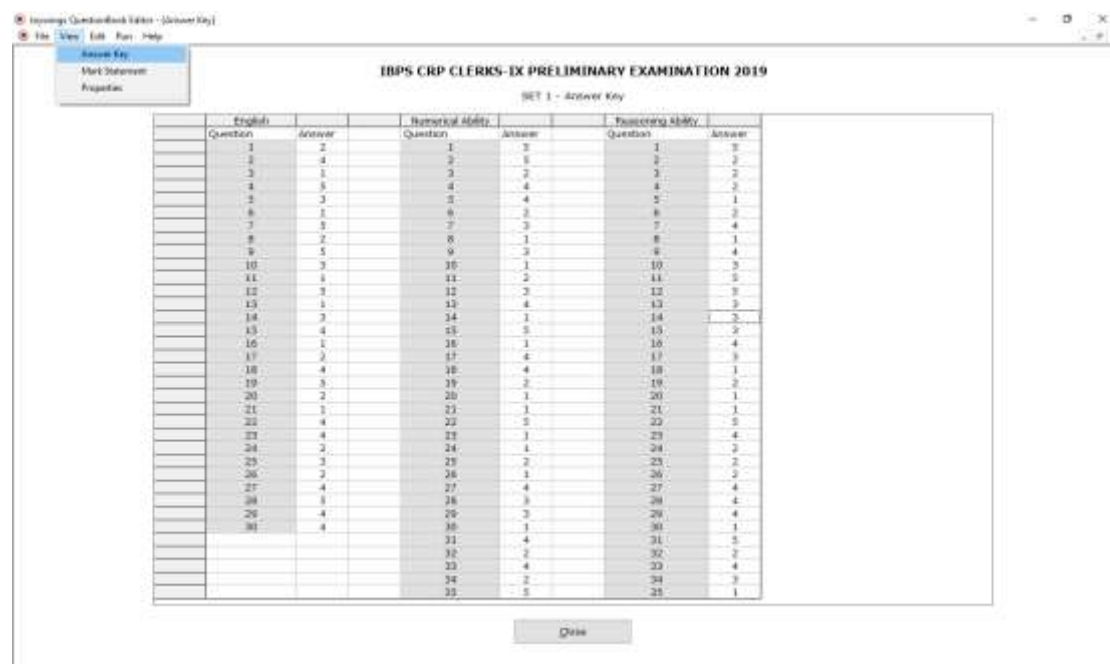

- This is the vendor profile file containing the information about the vendor.

v) LZO.hash

- For each new QuestionBook created, a unique hash file is generated by the Joywings QuestionBook Editor. This file must be kept safe if more question papers are added in the future and package is assembled again. In such case, while importing the QuestionBook, the Joywings QuestionBook Reader will identify the QuestionBook for existing Question Papers related to this QuestionBook and will import only the new question papers that does not exist on the candidate system. Moreover, the Joywings QuestionBook Reader won't ask for Activation Key for the second or subsequent times.

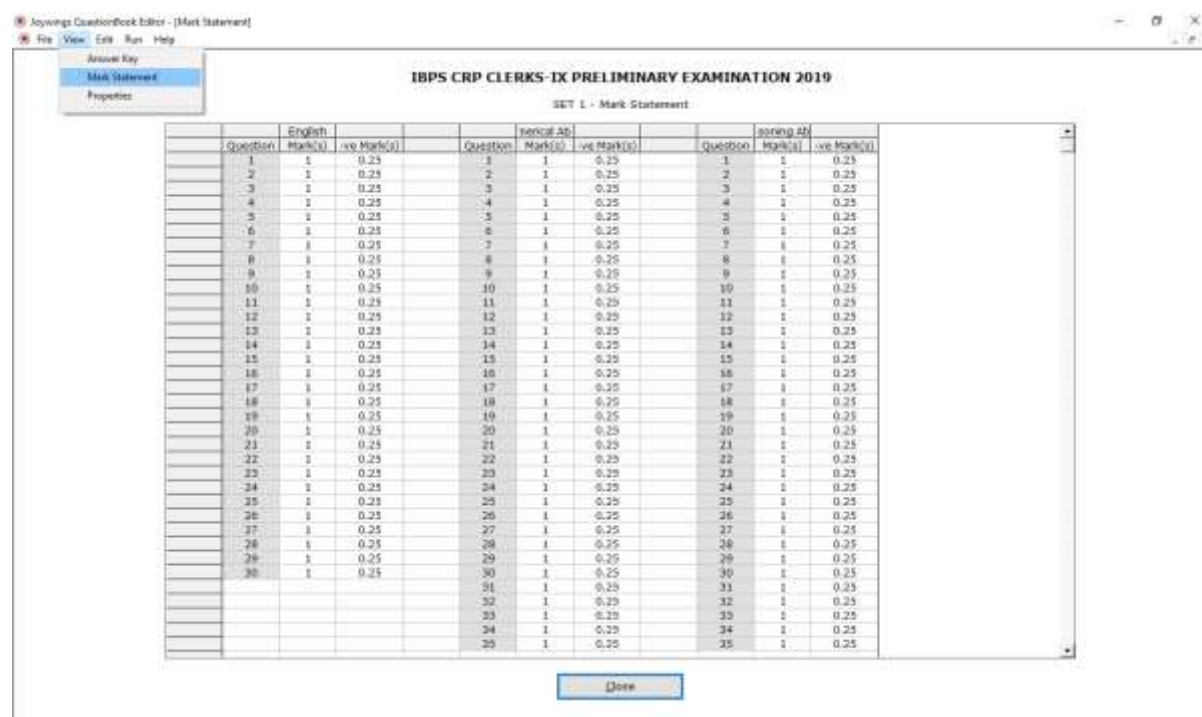

2.10 Viewing the Answer Key

Click on the View menu and select the 'Answer Key' submenu to view the answer index entered for each question as shown below –

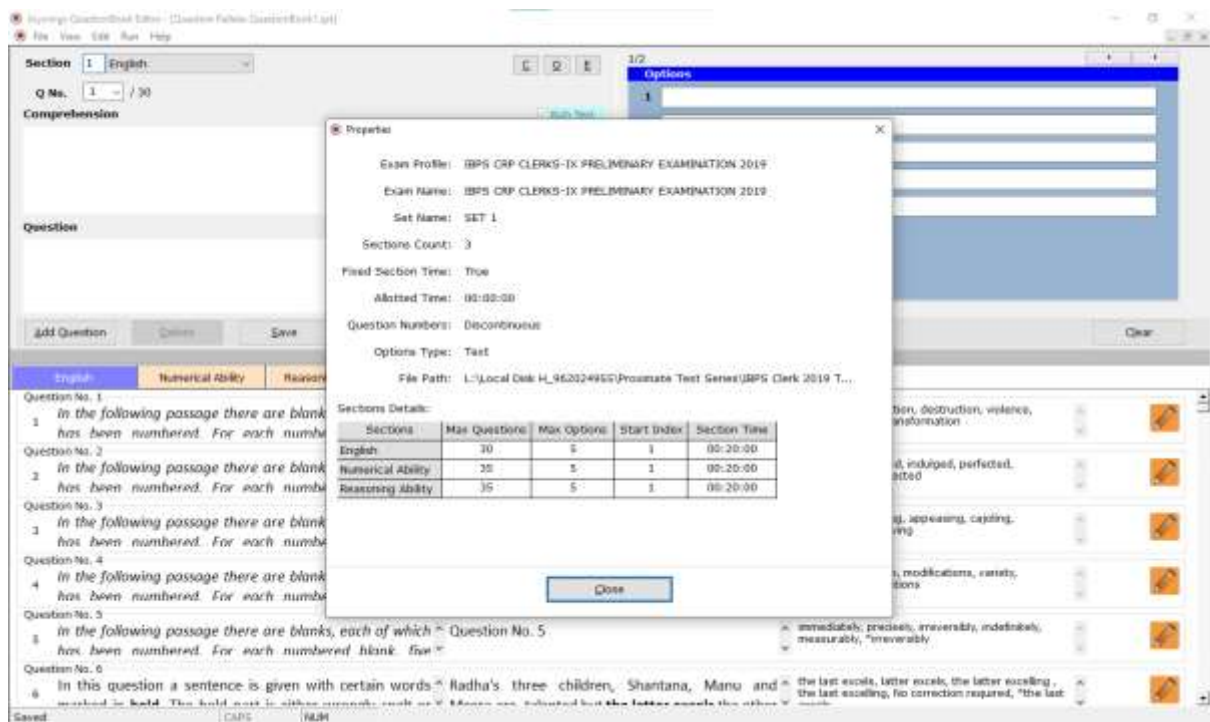

2.11 Viewing the Mark Statement

Click on the View menu and select the 'Mark Statement' submenu to view the marks allotted to each question as shown below –

2.12 Viewing the QuestionPaper Properties

Click on the 'View' menu and select the 'Properties' submenu to view the information about the QuestionPaper being edited as shown below –

3. Joywings QuestionBook Activator

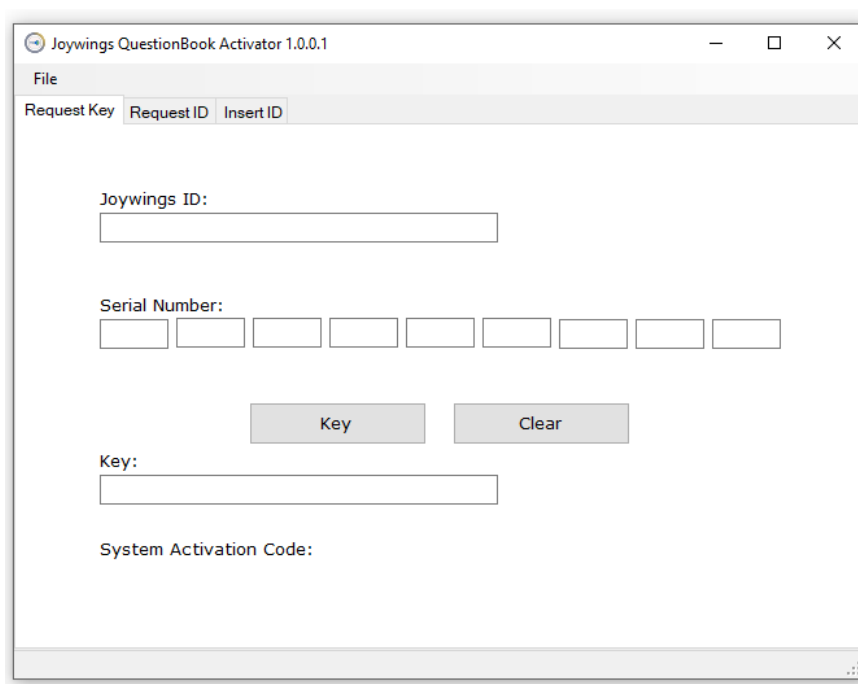

The Joywings QuestionBook Activator application provides the serial number required to import the QuestionBook (with subscription status paid) in the Joywings QuestionBook Reader application.

3.1 System Requirements

- i) A Windows computer with 1 GHz or faster processor. 1 GB RAM or higher.
- ii) Windows 7 SP1, Windows 8, Windows 8.1, Windows 10, Windows 11 operating systems supported.
- iii) .NET Framework 4.6.1 is required to be installed on the user computer.

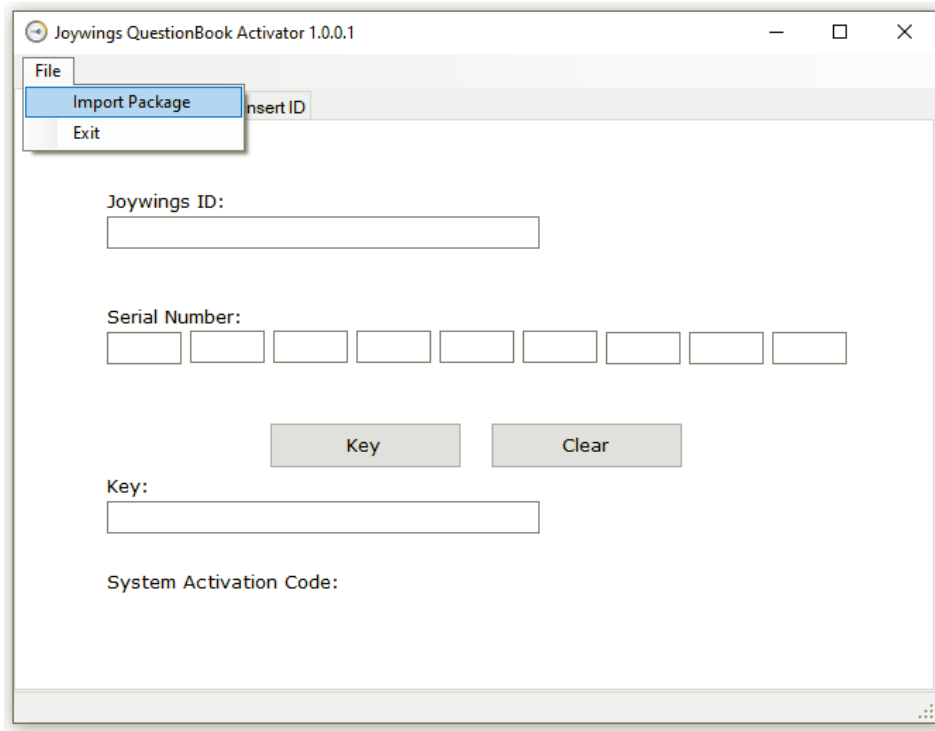

3.2 Getting Started

The starting interface of the application is as shown below -

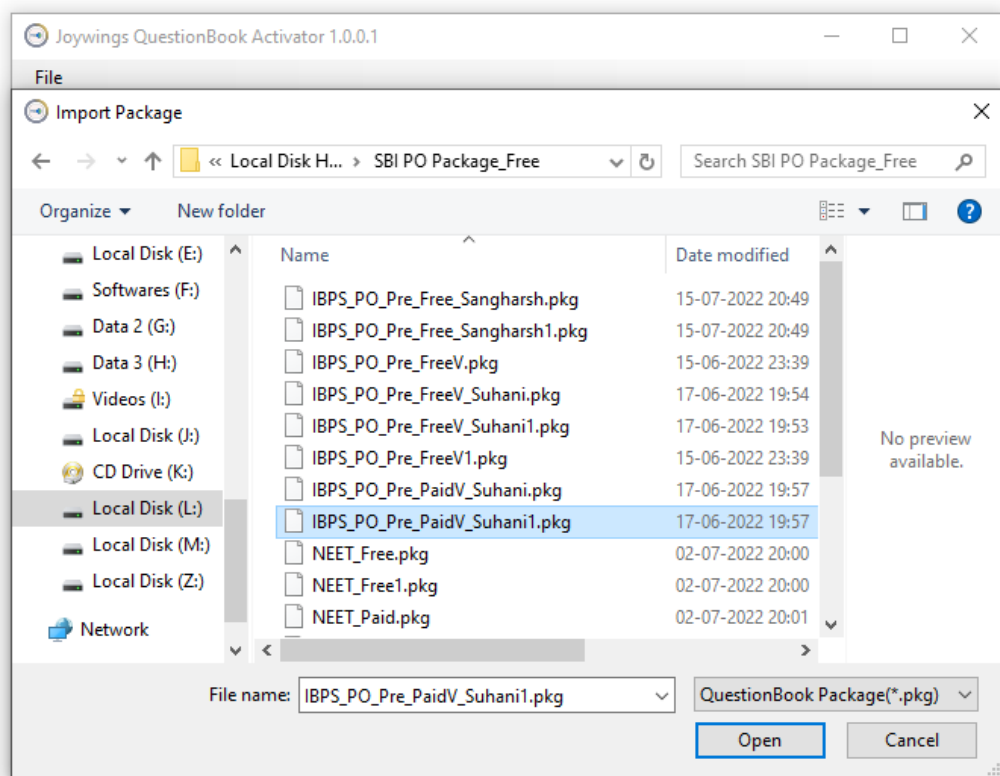

3.3 Importing Activator QuestionBook Package

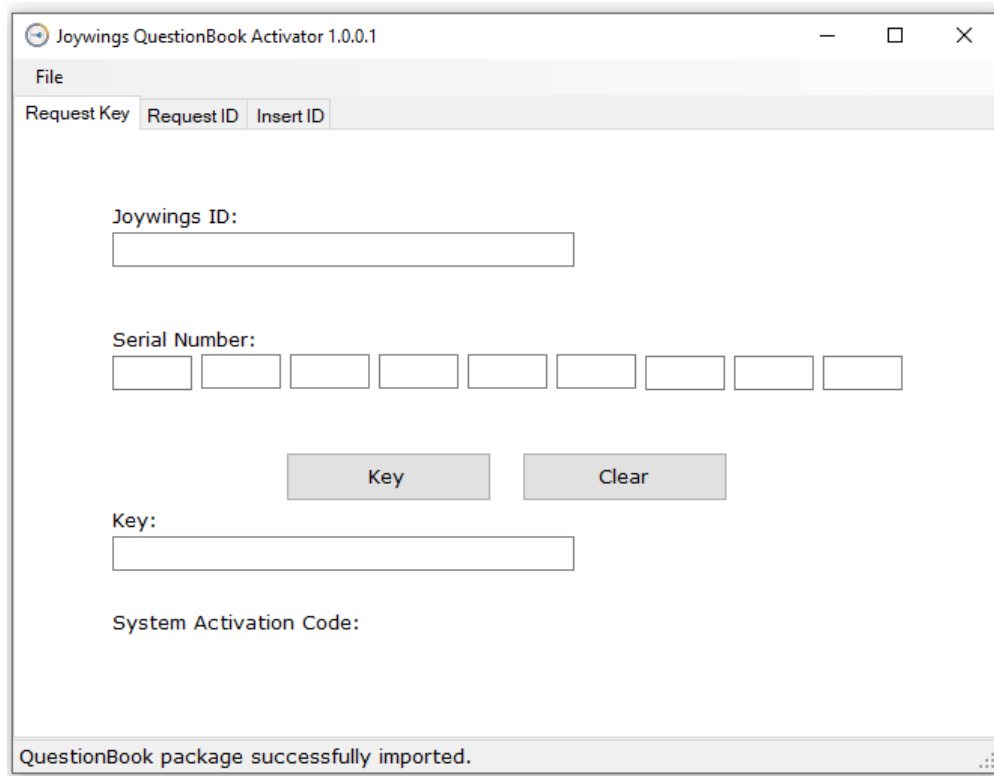

First the application needs to import the activator file generated by the Joywings QuestionBook Editor besides the distributable file for which the serial number will be generated on the candidate computer. To import the activator file, click on the 'File' menu and select the 'Import Package' submenu as shown in the picture below –

Clicking on the 'Import Package' submenu opens a dialog box to select the valid activator QuestionBook package file as shown below.

After the successful import the message "QuestionBook package successfully imported" is displayed at the bottom of the application as shown in the picture below -

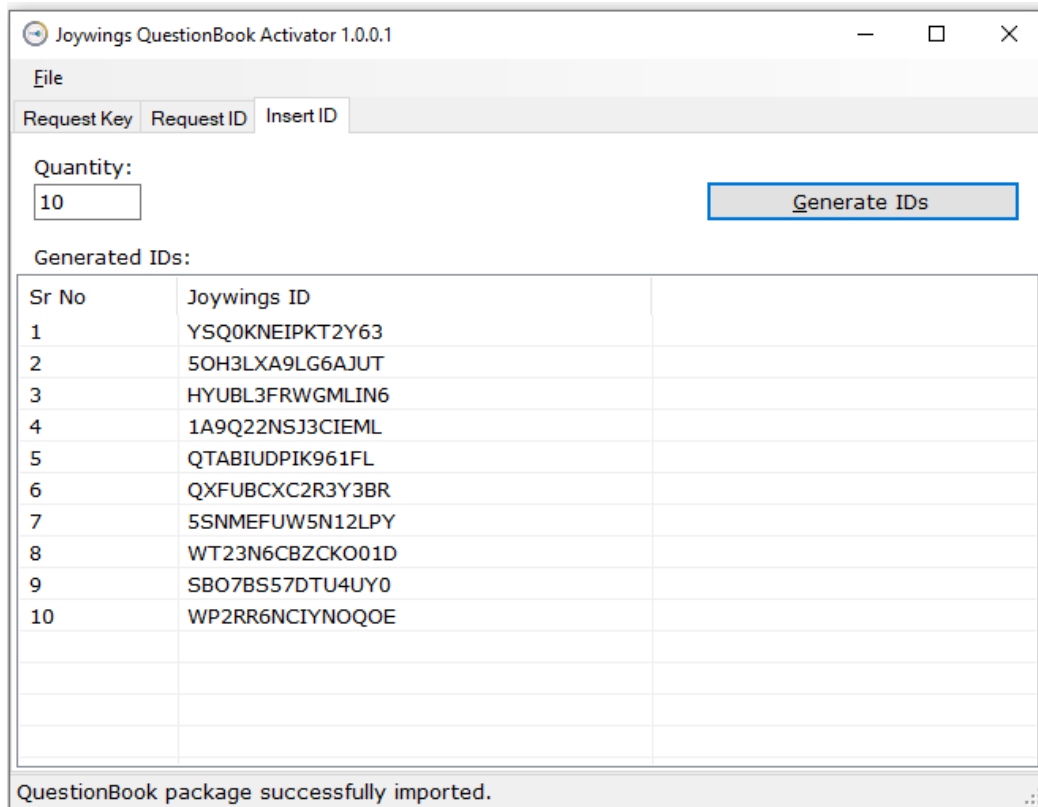

Now the application is ready to serve keys for the serial numbers generated by the Joywings QuestionBook Reader for the QuestionBook package imported above.

While anyone can install the Joywings QuestionBook Reader, import this QuestionBook, generate serial number and ask for activation key, the user might want only the candidates who have paid for this QuestionBook must be able to get the activation key. For such requirement the unique Joywings ID generated by the Joywings QuestionBook Activator must be given to individual candidates who have paid for the QuestionBook. After the candidate imports the QuestionBook he must provide this unused Joywings ID along with the Serial number to the user to get the Activation Key.

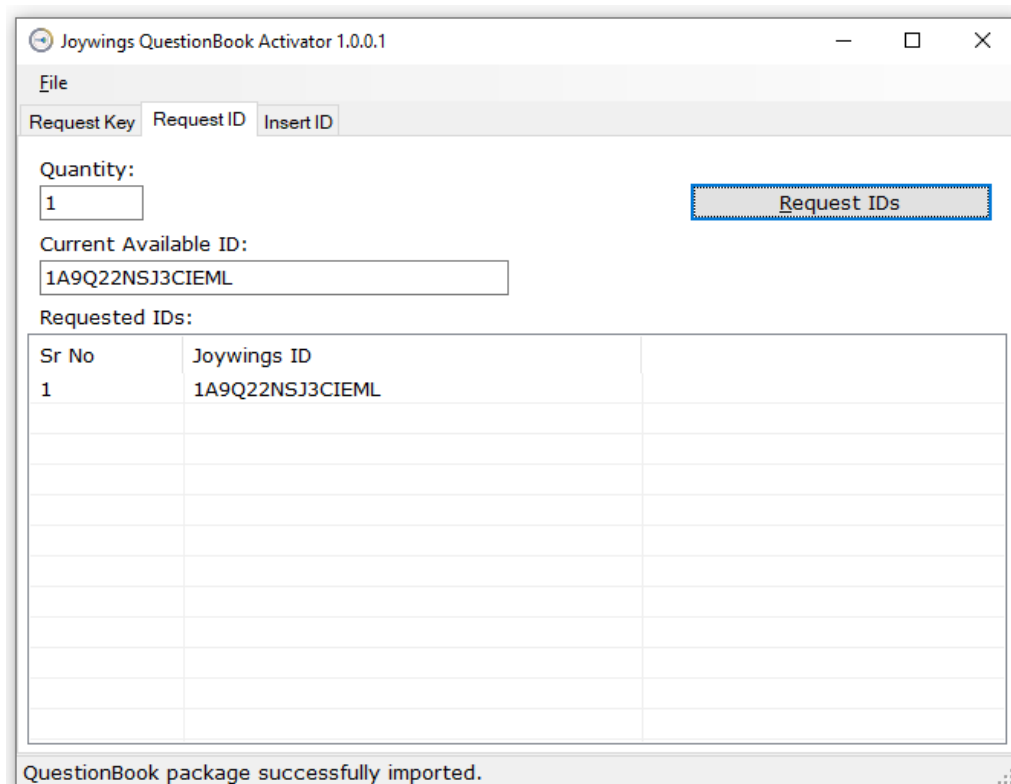

3.4 Inserting the Joywings IDs

The user needs to insert the required number of Joywings IDs in the Joywings QuestionBook Activator. Let us say the user needs 10 IDs for 10 candidates. Therefore 10 IDs need to be inserted in the Joywings QuestionBook Activator. Click on the 'Insert ID' button. Enter the number of IDs to be generated (i.e. 10) in the Quantity textbox and click on the 'Generate IDs' button. This generates 10 Joywings IDs as shown in the picture below –

3.5 Providing the Joywings ID to the candidate

To provide a Joywings ID to the candidate, click on the 'Request ID' button and click on the 'Request IDs' button. The available ID shows up in the 'Current Available ID' textbox as shown in the picture below -

This way unique Joywings IDs can be provided to the individual candidates to validate them against each new QuestionBook.

3.6 Generating the Serial Number for the candidate

The serial number is generated on the candidate computer after the QuestionBook is imported as shown in the picture below –

The image displays two screenshots of the 'Import - Joywings QuestionBook Reader' application window, which has a purple header bar with the text 'For NEET Aspirants' and the 'Suhani Academy' logo.

The top screenshot shows the 'Package Summary' screen. It contains the following information:

- QuestionBook Name: CRP FOR PO/MT PRELIMINARY EXAMINATION 2019
- Number of Sections: 3
- English (30 Questions), Quantitative Aptitude (35 Questions), Reasoning Ability (35 Questions)
- QuestionBook Quantity: 4
- Maximum Attempts: 2
- Subscription status: Paid (Requires Activation Code)
- Publisher: Joywings Inc.
- Email: joywings@protonmail.com
- Website: www.joywings.com

Navigation buttons '< Back' and 'Next >' are visible at the bottom.

The bottom screenshot shows the 'Serial Number' and 'QuestionBook Activation Key' input fields. The 'Serial Number' field is pre-filled with the value 'B88B-Y0AS-IGP4-07VZ-X3SJ-VZVZ-JWSJ-07UE-0707'. The 'QuestionBook Activation Key' field is empty. 'Validate' and 'Exit' buttons are located at the bottom.

The candidate needs to provide this Serial Number in the Joywings QuestionBook Reader along with the Joywings ID to the user to get the QuestionBook Activation Key.

The user enters the Joywings ID and the Serial Number provided by the candidate and gives back the QuestionBook Activation Key to the candidate. This key is generated as shown below –

The screenshot shows a window titled "Joywings QuestionBook Activator 1.0.0.1". It has a menu bar with "File" and a tabbed interface with "Request Key", "Request ID", and "Insert ID". The "Request Key" tab is active. The form contains the following elements:

- Joywings ID:** A text box containing "1A9Q22NSJ3CIEML". Below it is a green link "New ID".
- Serial Number:** A row of ten buttons containing "B88B", "Y0AS", "IGP4", "07VZ", "X3SJ", "VZVZ", "JWSJ", "07UE", and "0707".
- A red status message: "User registered successfully."
- Two buttons: "Key" and "Clear".
- Key:** A text box containing "4PY42VVDVV2D2922".
- System Activation Code:** The text "LKYZONW23A4DX89E4D4DV99E3AFG3A3A".
- A status bar at the bottom left shows "Length 36".

The activation key is '4PY42VVDVV2D2922' for the Serial Number –

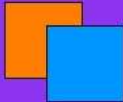

'B88B-Y0AS-IGP4-07VZ-X3SJ-VZVZ-JWSJ-07UE-0707'

with the Joywings ID –

'1A9Q22NSJ3CIEML'

When the candidate enters the activation key in the Joywings QuestionBook Reader, the QuestionBook is imported in his system as shown below –

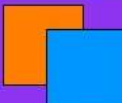

Import - Joywings QuestionBook Reader
